The Darjeeling Hill-sides and Rivers Conservation Bill, 1919.**STATEMENT OF OBJECTS AND REASONS.**

THE evils caused by deforestation and careless cultivation on the hill-sides of the district of Darjeeling have engaged the attention of Government for some time past. In 1905 the Indian Tea Association called the attention of Government to the question, and suggested the appointment of a Commission to investigate the matter. Inquiries made by various officers showed that there were certain definite evils to be dealt with, and that in particular the rough cultivation of clearings without precautions and the deforestation of slopes too steep for any kind of cultivation and their exposure to unrestricted grazing were causing serious landslips likely to be detrimental to the drainage of the district and to its general welfare. There was also evidence that not only were the hill-sides eroded and the river banks destroyed in this manner, but also that the violent floods were causing considerable havoc in the plains. The necessity of dealing with the question thoroughly and effectively was, therefore, apparent.

A Committee was accordingly appointed in 1910 to examine certain typical areas, to investigate each case of specific damage, and to suggest possible remedies or palliatives. As a result of their inquiries the Committee found that serious damage was being caused by landslips, the gradual washing away of the soil of the hill-sides, and the scouring and widening of the beds of rivers and torrents. They recommended the adoption of drastic measures, involving the reafforestation of certain areas, the prohibition of grazing and certain forms of cultivation, and the reservation of a protective belt of land along the banks of all main streams. It was, however, represented by the Commissioner and the Deputy Commissioner that the general adoption of these measures would entail the acquisition of large areas of land, the cost of which would be prohibitive; and that such stringent interference with existing rights would cause ruin to many cultivators and hardship to nearly all, and was not really necessary. It is impossible, even if it were desirable, entirely to prevent landslips, though it is usually advisable when a landslip has occurred to prevent the process of recuperation being interfered with by premature grazing, cultivation, or cutting down of vegetation. There is also reason to believe that the more enlightened landholders and cultivators of the district are beginning to realize the necessity in their own interest of avoiding wasteful methods of cultivation on the hill-sides and along the banks of streams; and that it will be sufficient, instead of entirely extinguishing private rights in such areas, to take power to intervene when a man's action is detrimental to his neighbours or to the public interests. The matter was the subject of inquiry and elaborate discussion for a considerable period. The Bill as finally drafted is intended to induce every landholder and cultivator to become his own conservator as far as possible. When it is necessary, in order to prevent public loss or danger, to enforce certain action or abstention from certain action in a particular area, the owners or tenants in that area will in the first place be called upon to take the necessary measures; and it is only in the event of their failure to do so that Government will take the extreme course of assuming temporary control of the land in order to carry out upon it the measures required to secure the public safety.

Provision has been made enabling Government to exempt certain classes of cultivation, which are either beneficial or innocuous to the hill-sides, from the operation of an order applied to a particular locality. The classes of cultivation to be exempted may vary according to circumstances.

Provision has also been made to ensure that cultivation which, if conducted with due precautions, may be innocuous in a particular locality, shall be so conducted.

Power has been taken to compound offences by accepting compensation, and provision has been made for appeals against orders passed by the Deputy Commissioner under sections 3 and 5 of the proposed Act, and in respect of the matters referred to in section 13, and for compensation to owners and occupiers whose property will be affected, and for allowing them adequate time to carry out any action which may be required of them.

RESOLUTION—No. 105P.J.D.

READ—

The Report on the Administration of the Jail Department in the Presidency of Bengal for the year 1918.

READ ALSO—

The Reports for the years 1917 and 1916 and the Resolutions of Government recorded thereon.

THE total number of prisoners admitted to the Bengal jails during the year was 83,207, or 1,509 less than in 1917, but the average daily population in 1918 was 16,761, or 832 more than in the previous year. There wa

therefore overcrowding at times in nearly all jails, and there are no signs, so far, that the increase in criminality which occurred after the outbreak of the war is subsiding. If it persists, the problem of providing additional jail accommodation will have to be faced. Some relief will, however, be given by the jails which will be built at the headquarters of the new districts which are to be created in Midnapore and Mymensingh.

2. It is satisfactory to find that, in spite of overcrowding, the number of jail offences of all kinds was substantially less than in the previous year, the ratio of total punishments to daily population being 142 against 166 in 1917. The penalty of whipping was inflicted in 42 cases as compared with 51 in the previous year.

3. General health conditions were unfavourable, especially during the last six months of the year, when influenza was prevalent throughout the country. The daily average number of prisoners in hospital was 963 as compared with 825 in the previous year, and the death rate rose from 15·8 per mille in 1917 to 21·3 per mille. The latter figure is, however, only slightly above the quinquennial average, and is one per mille less than in 1916. It is a curious fact that the jails suffered much more from the earlier outbreak of influenza in July and August than from the outbreak at the end of the year which proved so fatal among the general population. During November and December, when Calcutta was suffering severely, the Presidency and Alipore jails were practically free from the disease. Altogether 3,426 cases of influenza occurred in the Bengal jails, and of these 53 proved fatal. There was a marked improvement in the health of the prisoners in the Barisal and Barasat jails, which have caused anxiety in previous years, but high death rates are reported from Rangpur, Khulna, Jalpaiguri and Bogra. Serious outbreaks of dysentery occurred in the Rangpur and Jessore jails, where the inexperience of the staff added to the difficulty of combating the disease. The Governor in Council notices with regret the neglect of the sanitary condition of the Khulna jail which led to an outbreak of cholera. The Superintendent responsible has been removed. The death rates in all the Central jails except Midnapore were below the provincial average, and Midnapore has shown improved results as compared with the previous year.

4. The popularity of the wheat scale dietary continues to increase. Three-fifths of the total number of prisoners have voluntarily adopted this scale, and the statistics furnished by the Inspector-General again show its satisfactory effects on their general health. The average cost of this diet is the same as that of the ordinary rice diet.

The special ward for tuberculosis cases at Suri has proved useful. The construction of a ward in the Comilla jail for the reception of similar cases from the jails in Eastern Bengal has recently been completed.

5. The Juvenile Jail at Alipore continues to do excellent work. Further improvements have been made in the school where reading, writing, arithmetic and freehand drawing are now taught by a competent staff, while the physical training has produced an excellent effect on the health and spirits of the boys. Moral and religious instruction is given daily; discipline is good and the number of petty offences and punishments is decreasing. After experiencing considerable difficulties, Sir Walter Buchanan has succeeded in forming an After-care Association in Calcutta, which has found work for several of the boys on their release. There is scope for much useful work in this direction, and His Excellency in Council trusts that philanthropic gentlemen will interest themselves in this sphere of social reform.

The manufacture of quinine tablets and treatments continues to be the most important industry in the jail. The value of the quinine sold by the jail during the year amounted to over Rs. 3½ lakhs, and the profit exceeded a lakh.

6. The outturn of jail manufactures was again satisfactory, though there was a fall in the net cash earnings, due to the larger stock of raw materials and manufactured goods remaining in hand at the close of the year, as compared with the previous year, and also to larger outstandings due to the jails. The Presidency jail increased its outturn of gunny cloth and was able to make a substantial profit, owing to the low price of raw jute at the beginning of the year. The Midnapore central jail had to meet exceptionally large demands for cotton uniforms and durries from the Police Department, while the blanket factory at the Dacca central jail was engaged all the year in manufacturing blankets for the army. The Rajshahi jail increased its output of castor oil, which yielded a considerable profit.

7. The jails in Bengal continued to help in war work. As in previous years, prisoners volunteered during 1918 for service as sweepers, dhobis and artisans in Mesopotamia, and 27 were conditionally released and made over to the military authorities. The jails supplied to the army large quantities of bandages, dusters and doosuty cloths, besides a number of other articles.

8. The conduct of the warder staff was on the whole satisfactory, and there was a considerable decrease in the number of departmental punishments. Resignations, however, show a tendency to increase, and the rise in prices and the competition of private firms are adding to the difficulties of recruiting suitable men.

9. The Governor in Council has read with pleasure the tribute paid by Sir Walter Buchanan to the officers of the Department. Lieutenant-Colonel Thompson has been awarded the Order of an Officer of the British Empire in recognition of his services in connection with the war at the Presidency jail, while Mr. M. Leach has been made a member of the same Order for similar services at the Dacca jail.

To Sir Walter Buchanan, who has recently retired from the service, the special acknowledgments of Government are due, not only for the work of the year, but also for his successful and efficient management of the Department during his seventeen years' tenure of the post of Inspector-General of Prisons, Bengal. It is a matter for satisfaction that his long experience of Jail administration is not lost to the country but will be available to the forthcoming Jail Commission, of which he has been appointed a member.

ORDERED that a copy of this Resolution be forwarded to the Inspector-General of Prisons, Bengal, for information.

ORDERED also that a copy of this Resolution and a copy of the report be submitted to the Government of India in the Home Department.

ORDERED also that the Resolution be published in the *Calcutta Gazette*.

By Order of the Governor in Council,

J. H. KERR,

Chief Secy. to the Govt. of Bengal.

**TRIENNIAL RESOLUTION ON THE WORKING OF THE
CALCUTTA MUNICIPALITY DURING THE THREE YEARS
ENDING 31ST MARCH 1918.**

GOVERNMENT OF BENGAL.

MUNICIPAL DEPARTMENT.

Municipal.

DARJEELING, THE 4TH JUNE 1919.

RESOLUTION No. 281T.—M.

READ—

The reports on the municipal administration of Calcutta for the years 1915-16, 1916-17 and 1917-18 together with the reviews of the reports recorded by the General Committee and the Corporation.

This resolution deals with the administration of the Corporation of Calcutta during the three years ending the 31st March 1918. In view of the economic strain caused by the war, it might have been expected that this period would have caused grave embarrassment to the Calcutta Corporation, with a deficient sinking fund invested in its own debentures, which could only be realized in any considerable amount at a heavy loss. The accretion of large revenue balances, on which the previous resolution commented, enabled the Corporation, however, to surmount financial difficulties. Loans amounting to over 95 lakhs were repaid during the period under review, and although the Corporation provided more than 60 lakhs for this purpose from its revenue funds, it possessed a closing balance at the end of 1917-18 of no less than 45 lakhs—a fact significant of its financial strength.

2. **Elections.**—The sixth general election of Ward Commissioners under the present Act was held on the 20th March 1918. There were 35,153 voters with 30,507 votes, as compared with 38,412 voters with 95,492 votes at the time of the previous election. The votes actually given at the election represented 53 per cent. of the voting power as compared with 57 per cent. in 1915. The decrease is ascribed to recent amendments in Schedules IV and V of the Calcutta Municipal Act which abolished voting by proxy and required firms, companies, etc., to apply in time (which many failed to do) for the insertion of the name of a representative in the election roll. The newly-constituted body of Ward Commissioners consists of 19 Hindus, 2 Englishmen, 2 Jews, 1 Anglo-Indian and 1 Muhammadan. A novel feature of the election was the interest shown by the European and Anglo-Indian rate-payers, of whom nine offered themselves for election as against two in 1912 and 1915. In the contested wards keener interest than ever was shown in the election, but the Chairman remarks that there are still no signs of elections being fought on principles as opposed to purely personal considerations.

3. **Accounts.**—The accounts department has been reorganized, the complex system of the Corporation accounts simplified and the accounts code revised. According to the statement of revenue funds, actual receipts rose from Rs. 1,14,44,080 in 1915-16 to Rs. 1,23,49,448 in 1917-18, or by nearly 7.9 per cent., while payments fell from Rs. 1,10,98,520 to Rs. 1,10,88,037, the triennium closing with an actual balance of Rs. 55,52,908. On the basis of the accounts of income and expenditure, the income in 1915-16 was Rs. 1,14,30,725 and the expenditure Rs. 1,10,64,871, while in 1917-18 they amounted to Rs. 1,23,18,132 and Rs. 1,12,20,812, respectively, the closing balance being Rs. 45,13,541.

Owing to financial exigencies, the Corporation was compelled to curtail expenditure on capital works and to husband its resources in order to meet its loan liabilities. A loan of 28 lakhs obtained in 1917 from the Bank of Bengal, however, eased the situation, and the Corporation has still its large

revenue balance intact. This balance consists largely of municipal securities which may not be immediately realizable except at a discount, but the Governor in Council trusts that, as soon as may be practicable, the Corporation will utilize its surplus for the execution of long-pending schemes and works of which the cost may legitimately be defrayed from revenue funds.

4. **Loans.**—Of the loan of 35½ lakhs which the Government of India authorized the Corporation to raise in 1914-15 debentures to the face value of Rs. 13,94,300 were issued in 1915-16, but the raising of the balance was suspended under orders of Government. Loans, however, to the extent of Rs. 95,01,900 had to be redeemed, and as the accumulation in the sinking fund only amounted to Rs. 38,39,577 (mainly in debentures of other loans) the balance had to be borrowed by the Corporation for their redemption, and debentures to the extent of Rs. 20,32,700 were subscribed for by it at par owing to the unfavourable state of the money market. With the exception of the sum of Rs. 13,94,300 mentioned above, no loan was raised for capital works during the triennium.

The loan funds opened with a balance of Rs. 9,40,811 on the 1st April 1915. The total receipts during the three years (*e.g.*, on account of loan receipts, sale of surplus land, etc.) amounted to Rs. 80,77,782 and the expenditure to Rs. 84,03,796. The balance left at the end of the triennium amounted to Rs. 6,14,797.

The net indebtedness of the Corporation on the 31st March 1918, excluding the accumulations in the sinking fund, was Rs. 4,42,82,919 as against Rs. 4,58,80,234 on the 31st March 1915. It is satisfactory to note that this represents a decrease of Rs. 15,97,315 in the debts of the Corporation compared with an increase of Rs. 20,89,102 in their liability during the preceding triennium.

5. **Sinking fund.**—The balance at the credit of the sinking fund on the 31st March 1918 was Rs. 607 in cash, and securities of the face value of Rs. 38,99,600. To make good the temporary depreciation in the value of these securities, the Corporation was required to pay a sum of Rs. 5,87,220 into the fund during the period under review. The liabilities for interest and sinking fund charges on account of the total outstanding debt of the Corporation on the 31st March 1918 amounted to Rs. 31,82,980.

6. **Assessment.**—The assessed annual valuation of the city continued to increase and stood at the end of the year 1917-18 at Rs. 4,80,98,516 as compared with Rs. 4,34,00,000 at the end of the year 1914-15. A large increase was obtained by the general revaluation of the Port Commissioners' property. The Corporation is of opinion that the assessment department is apt at a general revision to enhance assessments on principle, even if the facts may not justify increase. The Governor in Council is not in a position to test the accuracy of this view; the only criteria which the administration reports furnish, *viz.*, the small percentage of appeals decided against the department and the high prices realized by the sale of surplus lands, though not conclusive, point in the other direction.

7. **Collections.**—The collection and license departments maintained their record of efficiency. Both in 1916-17 and 1917-18 the percentage of collections for the consolidated rate calculated on the net demand reached the record figure of 99·8, while the collections of the license department in 1917-18 were the highest on record. The increase of fees from trades and professions appears to point to the continued prosperity of the city during the war.

8. **Water supply.**—The average quantity of water supplied to the city during the last year under review rose to 62½ million gallons per day (36 filtered and 26½ unfiltered), with an average consumption of 89 gallons of filtered and 99½ gallons of unfiltered water per head per day. Judged by European standards and compared with the allowance which suffices in small Indian municipalities enjoying a pipe supply, this quantity would not

clamours for a continuous supply, while often oblivious to the necessity of measures for the prevention of waste. A committee has been considering the whole question of filtered water-supply, and its final recommendations will shortly be laid before the Corporation. The experiment of metering houses in certain areas where the consumption is very high has given good results. Complaints regarding the supply of unfiltered water appear to be well founded, and in view of the danger to the public health which must arise where the pressure for flushing purposes in an underground drainage system is insufficient, the Governor in Council is glad to learn that the adequacy of supply and of the pumping plant is now under examination.

9. **Drainage.**—The anxiety to which the silting of the Bidyadhari river had given rise, as threatening the efficiency of the whole drainage system of Calcutta, has been relieved for the present by the adoption of Mr. Addams-Williams' spill area scheme. Land has been acquired near the Salt Lakes to serve as a spill area for the river, and although full effect has not been given to the scheme, recent observations show that deterioration has been largely arrested. The project for the installation of pumping plant at Palmer's Bridge pumping station, which was designed to make the outfall works independent of the silting of the reservoir, has consequently been deferred for the present.

The extension of its underground drainage system into the suburbs, is perhaps the most pressing task which now confronts the Corporation. The insanitary conditions which prevail in the outlying parts of the municipality call for early remedies, and in recognition of this fact, the Corporation is undertaking a combined drainage scheme for Wards XIX and XX, to form a part of the Park Street extension scheme of the Improvement Trust. The canal area drainage scheme has given good results, and the sewerage of the roads west of Tolly's Nullah—a long-delayed reform which is now to be financed from revenue funds—together with the sewerage and drainage schemes for Ward XXI and the Tangra area, should also improve the public health.

10. **Roads and Lighting.**—The Corporation is to be congratulated on the success of its asphaltum pavement. The Governor in Council will watch with interest the extension of this pavement to the northern parts of the city, where its durability will be even more severely tested than in Chowringhee. The Corporation has made patient experiments to discover the most suitable pavement for heavy bullock cart and motor lorry traffic, and its decision to spend 5½ lakhs on paving with stone setts, cement jointed, appears to be justified by experience.

The Governor in Council observes with pleasure the commendation of the Chairman on the administration of the lighting department. He agrees, however, with the statement of the Corporation in its review on the administration report of 1917-18, that oil-lamps are anachronistic in a modern city, and trusts that the installation of a better form of lighting in narrow lanes and passages will not be delayed. The replacement during three years of only 295 oil-lamps by gas lighting is *prima facie* not a striking record of progress in this direction.

11. **Markets.**—The reorganization of establishment in the Sir Stuart Hogg Market has been a useful reform, while the rebuilding of a portion of the market which was destroyed by fire and the remodelling of other blocks proved a remunerative investment. The scheme, which is already in hand, for the expansion of the market towards Free School Street appears to be sound and judicious. The new College Street Market also promises to be a financial success. Most of the private markets of Calcutta, however, still lag far behind modern requirements of sanitation, the control of the Corporation over markets registered under Act VII of 1871 being at present quite inadequate.

12. **Improvement works.**—The Kalighat improvement scheme has made considerable progress, while the cattle stock-yard and central stores are new works of importance. Much has been done to improve the amenities of city life by setting up apparatus for children's games in public squares. The Corporation has taken in hand several minor street schemes with excellent results. Such schemes are of distinct benefit to public health, and the

Governor in Council desires to commend this form of activity to the Corporation, which can thus supplement the larger operations of the Calcutta Improvement Trust.

13. Sanitary improvements.—The enforcement of private sanitary improvements during the triennium was to some extent suspended owing to the high price of materials. The Governor in Council trusts that, with improved conditions, the Corporation will resume an active policy in this direction. It is hardly necessary to remark that one of the most important duties of a health department is the inspection and abatement of nuisances or insanitary conditions, which are liable to prove detrimental to the health, comfort and convenience of citizens. The Mallanga Lane experiment, in which the Corporation has taken a small congested block of houses and aimed at utilizing its full sanitary powers in respect of each dwelling, is an interesting recognition of this fact.

14. Conservancy.—The Governor in Council is glad to observe that the Corporation definitely intends to remove as early as possible the refuse railway, which has long been a scandal and reproach to Calcutta. He recognizes that it has been impossible to substitute a motor traction system during the war, but the disrepair into which the permanent way and the locomotives have fallen, and the serious breakdown in the service on two recent occasions, make improvement imperative; and it is to be hoped that the Corporation will translate its intention into action without any avoidable delay.

15. Hackney carriages.—The number of carriages licensed by the Corporation increased from 3,060 in 1915 to 3,123 in 1918 in spite of a decrease in the number of 3rd class carriages. Under the Hackney Carriage Act recently passed into law, the control of the hackney carriage service is to be transferred to the Commissioner of Police, Calcutta.

16. Public health.—The health of the city showed a remarkable improvement during the triennium, the death-rate falling from 28.5 per mille in 1915 to 23.8 in 1917, while the birth-rate rose from 18.5 to 20.9 per mille. It is probable that the improvement in the birth-rate is due to some extent to the introduction of a more systematic house-to-house visitation and to increased activity on the part of the registration staff. The result of an investigation made in a typical ward in order to ascertain whether the low birth-rate was due to defective registration showed that 93 per cent. of the children under three years of age had been registered. The number of lapsing registration may, therefore, be assumed to be comparatively small.

It is a matter for congratulation that the rate of infantile mortality fell from 287.6 in 1915 to 239 per mille in 1917, but it must not be forgotten that the average rate in the United Kingdom is about half this figure. In Jogra-bagan with its densely populated slum areas, the rate was still 374 per mille in 1917. Excellent work has been done by the Lady Health Visitors and the midwives under them; and with the improvement of suburban drainage and the opening up of the more congested parts of the city by the Improvement Trust, a reduction of the present high rate may perhaps be expected. It also seems probable that "health visiting" or the periodical inspection of infants, combined with antenatal visiting and good midwifery, may lead (as it has led in England) not only to a reduction in immature births, but to the healthy up-bringing of children. The problem is, however, one of considerable complexity, and the Governor in Council trusts that its solution may be facilitated by the deliberations of the large representative committee which he has recently appointed to advise on the measures which should be taken to promote child welfare and to reduce infantile mortality.

The inequality of the death-rate among males and females continued, the ratio for the former being 19.8 per mille in 1917 and for the latter 32.1 per mille. The death-rate among females compares favourably with that for

clamours for a continuous supply, while often oblivious to the necessity of measures for the prevention of waste. A committee has been considering the whole question of filtered water-supply, and its final recommendations will shortly be laid before the Corporation. The experiment of metering houses in certain areas where the consumption is very high has given good results. Complaints regarding the supply of unfiltered water appear to be well founded, and in view of the danger to the public health which must arise where the pressure for flushing purposes in an underground drainage system is insufficient, the Governor in Council is glad to learn that the adequacy of supply and of the pumping plant is now under examination.

9. **Drainage.**—The anxiety to which the silting of the Bidyadhari river had given rise, as threatening the efficiency of the whole drainage system of Calcutta, has been relieved for the present by the adoption of Mr. Addams-Williams' spill area scheme. The inequality of the death-rate among males and females continued, the ratio for the former being 19·8 per mille in 1917 and for the latter 32·1 per mille. The death-rate among females continues to be considerably higher than that among males.

the rest of Bengal, while the mortality among males is abnormally low. The explanation is to be found probably in the more fixed and stable character of the female population, whereas the males are largely a floating population with a large proportion of adults in the prime of life.

The marginal figures show the mortality from plague, small-pox and tuberculosis: the high mortality from small-pox in 1915 was due to a severe epidemic, which fortunately did not recur in the two subsequent years. Mortality from cholera and malaria, which averaged, respectively, 1,277 and 1,123 a year, showed a tendency to decline. Much of the cholera is imported, but there is reason to believe that the use of river water by Hindu widows and the more orthodox sections of the Hindu community is a frequent source of infection. The use of the unfiltered water-supply and recourse to doubtful sources, such as tanks, in the absence of a continuous supply of filtered water, may also have been responsible for a certain number of cases.

The law relating to food and drugs was amended by the Calcutta Municipal (Amendment) Act, 1917, which enables the Corporation to control places of manufacture and storage of ghee in the city as well as ghee in course of transit, and to make the keeping of adulterants penal. Over 400 maunds of adulterated ghee were seized during the year, and since the passing of the Act there appears to have been on the whole an improvement in the quality of ghee sold.

17. Education.—The total extent of aid given by the Corporation to educational institutions of all kinds increased from Rs. 77,030 in 1915-16 to Rs. 85,528 in 1917-18. Grants to primary and technical schools amounted in the last year to Rs. 66,057, including Rs. 26,253 representing exemption from the rates; rates amounting to Rs. 17,068 were also remitted in favour of certain colleges and schools conducted as charitable institutions. The Deaf and Dumb School was given an annual grant of Rs. 2,400 and grants to free libraries amounted to Rs. 5,375. Government has completed an educational survey of the city and the whole question of the improvement of its primary education is now under consideration.

18. Personnel.—The Chairmanship was held by Mr. C. F. Payno, I.C.S., except, during his absence on leave, from the 18th November 1916 to the 31st October 1917, when Mr. Goode officiated. Mr. Payne vacated his office in April 1919 for reasons of health and the Governor in Council desires to take this opportunity of recognizing the valuable services which he has rendered to the Corporation. He has been associated with the Corporation as Deputy Chairman and Chairman since the year 1904 and has administered its affairs with conspicuous success, a result due to his intimate knowledge of the details of municipal work, his sound judgment and administrative ability, no less than to his cordial relations with the Commissioners. Mr. S. K. Sawday continued to hold the appointment of Deputy Chairman and Mr. R. M. Chatterjee that of Vice-Chairman. The Governor in Council also desires to record his appreciation of the excellent work done by both these officers.

**CERTAIN ASPECTS OF THE ORGANISATION AND POLICY OF
THE AGRICULTURAL DEPARTMENT IN BENGAL.**

GOVERNMENT OF BENGAL.

REVENUE DEPARTMENT.

Agriculture.

DARJEELING, THE 7TH JUNE 1919.

RESOLUTION—No. 631T-R.

As it is desirable to place the public in possession of the intentions and policy of the Agricultural Department in the agricultural development of the Bengal Presidency, the Governor in Council deems it advisable to explain in some detail certain aspects of the organisation of the Department, together with some suggestions derived from the experience of other countries as to how the people can best benefit from its activities.

2. The necessity for private effort.—The two main branches of the Department are the research and demonstration branches. It is, however, clear that the activities of the Department in respect of the demonstration of the results of the investigations of the research branch cannot be expected to reach more than a fringe of the agricultural population without the help of the public. On the one hand, the extent of such activities is conditioned by financial considerations; on the other hand, any development of the kind is of no avail if the people are not ready or cannot arrange to take advantage of it. Individually the agriculturist is ready; experience in this country has shown that if he can see with his own eyes the value of an improvement he will adopt it. But if all are to benefit, experience in other countries shows that the agriculturists must meet Government half-way in the matter. It has been found in those countries that, if small associations of agriculturists are formed to test and adjudicate on suggested improvements, to discuss their successes and failures with each other and to bring their needs to the notice of the Agricultural Department, then not only is the practical problem of how to reach the whole agricultural population solved, but there is hardly any limit to advancement in the direction of improved production, economic distribution, improvement of breed, and indeed in all mental and moral development. In the words of an American Professor of Political Economy, Dr. J. A. Ryan, "The transformation in the rural life of more than one European community through co-operation has amounted to little less than a revolution. Higher standards of agricultural products and production have been set up and maintained, better methods of farming have been inculcated and enforced, and the whole social, moral and civil life of the people has been raised to a higher level. From the view-point of material gain, the chief benefits of agricultural co-operation have been the elimination of unnecessary middlemen, and the economies of buying in large quantities, and selling in the best markets, and employing the most efficient implements."

An essential condition, however, for the success of such associations is that they should be conducted on the basis of self-help. It is desirable for Government to assist such associations by teaching and exercising close control; but interference with their management or the grant of pecuniary aid by Government impairs the fundamental principle of self-reliance.

3. Formation of small Agricultural Associations in Bengal.—What precise form private effort should take in Bengal, it is perhaps too early to

prophecy. But undoubtedly there is every reason to believe, from the experience gained in other countries, that the formation of small agricultural associations should prove successful, whether as simple associations formed for the purpose mentioned in the preceding paragraph, or as co-operative societies dealing with the purchase of seeds and implements or with the distribution of agricultural produce. There is probably room for associations combining one or more of these functions. Apart from foreign experience and experience in other Provinces in India, there is also the definite fact that such simple associations, serving thanas, or even smaller areas, have met with marked success in the district of Birbhum in the Bengal Presidency. By the co-operation of official organisation and private effort of this nature not only will the successes obtained by experiment be brought to fruition in the interior, but Government will be furnished with a first-hand agency for ascertaining the real needs and the wishes of the agricultural population.

His Excellency in Council hopes, therefore, to see a further extension of this experiment throughout the Province, particularly in those districts in which demonstration farms already exist or are about to be established, as it is in those districts that the Agricultural Department can give the most help. The formation of such associations rests, however, with the public; and they will only be successful if they are financed and managed by the people. The principle accepted as essential by the Board of Agriculture in India, at their seventh meeting in 1911, was that those who are associated should all be agriculturists, really interested in local agricultural improvement.

The officers of the Departments of Agriculture and Co-operative Societies will be ready at all times with their advice and counsel.

4. Functions of existing Associations.—The extension of such small associations, if carried into effect, will inevitably involve some alteration in the functions of the existing provincial, district and divisional agricultural associations. The district associations may, for example, find, as time goes on, that their executive functions are being gradually absorbed by the working village societies. For the present, they may find that their duties are devoted to the organisation of such societies. The development will of necessity be a gradual process, and the present associations will doubtless adapt themselves to changing circumstances or give way to a different organisation if they cease to satisfy a real need.

The divisional associations, in particular, may not be required, while experience may show that the functions at present discharged by the provincial association can be more effectively performed by the new Board of the Agricultural Department which has been created.

5. Establishment of demonstration and seed farms.—The research work of the Department, or, more properly speaking, the investigation work, is mainly conducted at the Dacca Agricultural Station, which is the headquarters of the chemical, botanical and fibre sections, while there is a smaller investigating centre in West Bengal at Chinsura. At these centres problems of practical utility to Bengal agriculturists are investigated, such as the production of improved rice, jute and sugarcane, the suitability of various fertilizers, the prevention of insect pests and so on; and not, as there is a tendency in some quarters to believe, research work of a purely academic interest. For the purpose of testing the results obtained at these research stations and demonstrating their value, smaller stations or farms have been established at Rajshahi and Rangpur. Private farms at Burdwan and Kalimpong are also managed by the Department. The utility of these stations has been fully proved, and the necessity for small farms in every district accentuated, owing to the success attained in the plant-breeding sections of the Department. It has thus become necessary to arrange for the establishment of a demonstration and seed farm in each district, for the dual purpose of adjusting the results of scientific investigations at the central research stations to local conditions and of taking up the study of purely local

problems. Each farm will form a centre for the demonstration of such items as have been found by actual tests to be suited to local conditions. A programme is, therefore, under contemplation for gradually providing every district in Bengal with a demonstration and seed farm as soon as practicable, whilst official sanction has already been accorded to the establishment of such farms at Mymensingh, Bogra and Comilla.

6. Co-operation of District Boards in establishment of farms.—In view of the popular interest in agriculture, it has also been considered desirable to enlist the interest of the District Boards by requesting them to co-operate in the establishment, maintenance and management of the farms, subject to the professional control of the Agricultural Department.

In the view of His Excellency in Council the forms which the assistance from District Boards may legitimately take are as follows :—

- (1) Provision of land or of money towards the acquisition of the land or towards the necessary buildings.
- (2) Provision for the whole or a portion of the recurring expenditure on a farm.

The Governor in Council holds that District Boards should possess a voice in the management of the farms to the extent to which they contribute, subject to the professional control of the Department. Certain District Boards have already agreed to co-operate on these lines.

7. Demonstrators.—For the purpose of advertising the results obtained at the central research stations and on these farms and in advising the small agricultural associations which are expected to come into being, definite circles, such as the area of a police station, are necessary for demonstration work in charge of demonstrators working under the supervision of agricultural officers. Twenty-six district agricultural officers, i.e., one for each district in the Presidency, have now been sanctioned; five additional agricultural officers have also been appointed for special work; and there are at present altogether 79 demonstrators. It is contemplated that, with the completion of the programme for the construction of farms and the multiplication of small agricultural associations, the number of these demonstrators will be gradually but largely increased, until there is one for each police station in Bengal.

8. Seed-stores.—Experience in Bengal has shown that the immediate result of successful demonstration at any of the farms already in existence is a demand for improved agricultural appliances, and for seed of a new crop or of a new variety of crop. In fact, agricultural improvement in India necessitates in nearly every case the use of some new thing, whether it be seeds, fertilizers, implements or insecticides. This is exemplified by the insistent and growing demand for seed-stores in those districts where seed of a new crop variety has been issued. One seed-store will not be sufficient in a district; but seed-stores should be established also at every subdivisional head-quarters and at all demonstration centres. To produce the best results such seed-stores should, however, be established and maintained by such bodies as agricultural associations or co-operative societies or local authorities. It is not, therefore, the policy of Government to establish and maintain such seed-stores themselves for areas smaller than a subdivision. Not only would this involve too large a commercial undertaking for a Government—where attempted in other countries, it has ultimately been abandoned for this reason—but it would involve too great an encroachment on the sphere of private effort. There are already 30 stores in existence under the auspices of Government, and 71 are being created under local organisations.

9. General Policy.—By the continuance of investigation for practical ends at the central farms, by the creation of demonstration farms in every

district and seed-stores in every subdivision, by the appointment of a staff of agricultural officers and demonstrators in sufficient numbers to aid District Officers and the Department on the one hand, and the agriculturists, either individually or in association, on the other, the Bengal Government are aiming at the solution of the two problems which the Agricultural Adviser to the Government of India has declared to dominate the whole situation: the first is the provision of the best obtainable seed for any type of agricultural produce, and the second the creation of an agency for its distribution.

ORDER.—Ordered that a copy of the Resolution be published in the *Calcutta Gazette* for general information.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 5th June 1919.

Summary.—Light to moderate rain was general and was beneficial for standing crops. More rain is needed for agricultural operations generally. Weeding of autumn crops still continues in some districts. Preparation of land for winter rice is progressing favourably. The average price of common rice for the province has risen by about 2·3 per cent. as compared with that of the previous week. M. C. MCALPIN,

Secy. to the Govt. of Bengal.

REVISED RULES FOR THE GRANT OF LEASES OF WASTE LANDS FOR TEA CULTIVATION IN THE DISTRICTS OF JALPAIGURI AND DARJEELING.

SECTION I.

Rules for the grant of preliminary leases.

Area to which these rules apply.

1. **Lands available for lease.**—The lands that are generally available under these rules in the district of Jalpaiguri are the unsettled lands, excepting reserved forests, which lie within that tract of country bounded on the north by Darjeeling and Bhutan, west by the Tista river, south by the State of Cooch Behar, east by the Sankos river. Any lots of waste land belonging to Government which lie in any other parts of the district of Jalpaiguri, and which are not reserved for other purposes, may also be made available for tea cultivation under these rules.

The lands that are generally available in the Darjeeling district lie in the Kalimpong subdivision of the district east of the Tista. They are in two blocks, bounded as follows:—

I.—*North.*—The Labha forest block.

South.—The Lehti, Noam, Pugo and Mal forest blocks.

East.—The Nim Chu to its junction with the Chu Chu, then the Chu Chu to a point about $\frac{1}{2}$ mile below Ambikhi, then a line northwards up to the Ambikhi forest block, and thence southward the boundary of the Dalingkote forest block and the Goorobathan khas mahal: area about 19.95 square miles.

West.—The Jeet Chu.

II.—*North.*—The Mo forest block.

South and South-West.—The Mocha up to its junction with the Khoomanee.

East.—The Khoomanee and Rougo forest block: area about 8.50 square miles.

West.—The East Nar block.

2. **Lands not available for lease.**—The following lands will not ordinarily be available under these rules:—

(a) Lands which, by a notification in the *Calcutta Gazette*, are held to constitute a reserve for the supply of timber, fuel, grazing, or any other articles of general and public consumption.

(b) Lands not included in the above category, but which now bear India-rubber trees, or other valuable timber (such as sal, khair, chelownee, sissoo, etc.) in considerable quantities and in compact blocks or patches.

(c) Lands in respect of which any person or persons, or any village community, possess rights of occupancy, or such other rights or privileges as render it impolitic or unadvisable to grant such lands to any other person or persons for the purpose of tea cultivation.

(d) Lands lying within a distance of 60 feet on either side from the centre of any public road or thoroughfare: provided that such road or thoroughfare shall have been constructed, or shall be kept in repair, from public funds.

(e) Lands lying within a distance of 100 feet on either side of any considerable stream or watercourse. Such lands shall remain under forest with a view to prevent soil erosion.

(f) Lands which the Local Government may at any time, by a notification in the *Calcutta Gazette*, expressly exempt from the operation of these rules.

3. **Specific exclusion of areas—Power of Government.**—The Local Government reserves to itself the right to exclude any particular area (whether before or after application made) from the system of free grant and to sell grants in that area by auction on such terms of sale and in such manner as the Local Government may determine.

4. **Inclusion of excluded areas—Board's power.**—Applications for grants of land in areas not included in rule 1 or excluded by rule 2 must be referred to the Board of Revenue for the orders of Government in each case. When the application is for a grant of land ordinarily excluded under rule 2 (b), the Deputy Commissioner must after due enquiry satisfy the Board of Revenue that the lease will not imperil or seriously diminish the fuel supply of surrounding area.

5. Applications which involve the conversion of jote lands must be dealt with under the provisions of section II (rules 36 to 42).

Application for leases.

6. **Application for lease.**—Every person, company, or association, or promoter of a company or association, desirous of obtaining a grant of land under these rules, must, in person, or by a duly authorised agent, present an application on stamped paper of the value of 8 annas to the Deputy Commissioner of the district in which the land lies.

All such applications must be entered on receipt in Register 16.

7. **Particulars thereof.**—The application must specify—

(a) The name or names, and address or addresses of the applicant or applicants, and of his or their authorised agent, if any.

(b) The area, situation and boundaries of the land applied for, as far as they can be ascertained without a detailed survey.

(c) The particulars, if any, which may appear to the applicant to bring any part of the land applied for within the exceptions mentioned in rule 2. The application must also state whether the land or any part of it, is, or has ever been, cultivated in any manner, and be accompanied by such evidence or guarantees as shall satisfy the Deputy Commissioner and superior Revenue authorities that the applicant has *bond fide* at his command sufficient capital to enable him to open out the grant.

8. **Compactness of land.**—Every lot applied for must be compact, and capable of being enclosed in a ring fence; the exact boundaries will however be determined by the Deputy Commissioner with due regard to the provisions of rule 2 and the public interests generally.

9. **Limit as to area.**—Not more than 1,500 acres will ordinarily be granted to any one applicant, company, or association; and when more than 1,500 acres are applied for, the applicant must set forth specifically the grounds for such application.

10. Upon proceeding to survey and map out the grant, the Deputy Commissioner finds that it is desirable in the public interests, or for the sake of good boundaries, to include a larger area than 1,500 acres within the area to be granted on the application, it shall be in his discretion, with the sanction of the Commissioner, to grant to one applicant so much land, not exceeding 1,800 acres, as may be necessary to obtain good boundaries and to avoid waste, etc.

11. All applications for more than 1,500 acres will be forwarded by the Deputy Commissioner to the Commissioner who, if he desires to recommend compliance therewith, will forward them to the Board of Revenue, who are empowered to sanction such grants up to a limit of 3,000 acres, and shall take the orders of Government upon application for an area exceeding that amount.

12. **Holder of a grant may apply for a second grant.**—The Deputy Commissioner is empowered to accept applications for a second grant from the holder of an existing grant, provided that he is satisfied that the applicant has *bond fide* at his command sufficient capital to warrant the concession that he has

fulfilled all the conditions attaching to his existing grant and that the total area of the existing grant and the grant applied for does not exceed 1,500 acres. If the total area exceeds 1,500 acres, the sanction of the Commissioner, the Board of Revenue or Government will be required, as laid down in rules 9 and 10.

12. **Application when to be struck off.**—If an applicant shall fail to comply with any requisition of the Deputy Commissioner made in accordance with the rules, or fail to deposit any sums of money (other than the cost of survey under rule 13) for which the applicant is liable under them, within two months after notice in writing shall have been given to him by the Deputy Commissioner, the application may be struck off.

Preliminary Enquiry.

13. (a) **Procedure on receipt of application—Deposit of cost of survey, demarcation, etc.**—On receipt of an application, the Deputy Commissioner must satisfy himself, so far as lies in his power, that the requirements of the rules have been complied with. If he considers that the application should be rejected, he will record an order to that effect, giving his reasons for such rejection. An appeal will lie from such order of rejection to the Commissioner of the Division, if preferred within 60 days from the date of the order. If the application is for an area exceeding 1,500 acres and the Deputy Commissioner considers that it might properly be entertained, he will forward the application with his opinion to the Commissioner for submission to the Board. If the Deputy Commissioner considers that an application for such area as it is within his power to grant should be entertained, or, in the case of applications for areas over 1,500 acres, when the orders of Government or the Board accepting the application are received, the applicant or his agent will be required to deposit the estimated cost of the enquiry referred to in the next rule, and the cost of survey and demarcation to be made as hereinafter provided. The amount to be so deposited must be calculated at one rupee per acre of the total area applied for. If the area is found to be greater the sum of one rupee per acre must be paid on account of such excess area before a preliminary lease is granted.

(b) **Payments not to cover cost of boundary marks.**—Payments under this rule do not cover the cost of erecting permanent boundary marks under rule 30.

(c) **Refund of survey fee.**—In the event of no survey being made, *either on account of the withdrawal of the application or for any other reason*, the applicant shall be entitled to a refund of the survey fee deposited by him, subject to a deduction of the expenditure incurred on the enquiry (if any) under rule 14.

(d) **Failure to pay survey fee.**—If the cost of survey is not paid within one month of demand, the application shall be struck off.

14. **Enquiry into condition of land.**—On receipt of the sum payable under rule 13 (a), and of an agreement signed by the applicant, or by his authorised agent, to pay such further sum as may be required for the purpose above mentioned, the Deputy Commissioner will record an order appointing an officer to visit the land and to make a full and detailed enquiry into its condition and circumstances.

15. **Object of enquiry.**—The general object of such enquiry shall be to ascertain whether or not the land applied for can be granted under the rules in force; but the Deputy Commissioner may instruct the officer making the enquiry to furnish him with such other specific and detailed information as may seem to him to be necessary.

16. **Proceedings on completion of enquiry.**—On completion of this enquiry the officer making it will record the result thereof, and submit a report for the orders of the Deputy Commissioner. If the Deputy Commissioner, after considering the report, and after calling for such further explanations, oral or written, as he may deem necessary, shall be of opinion that the land applied for cannot be granted under the rules, and should not, therefore, be surveyed, he will record an order to that effect. An appeal will lie from such order to the Commissioner of the Division, if preferred within 60 days from the date of the order.

17. **Order for survey.**—If the Deputy Commissioner decides that the land applied for can be granted under the rules, and should therefore be surveyed, he will record an order to that effect.

18. **Value of forest trees standing on land.**—The Deputy Commissioner shall at once send a copy of any order passed under rule 17 to the Conservator of Forests, in order that an estimate may be made by the Forest Department of the value of any forest trees standing on the land. The Conservator of Forests will depute an officer to examine the land and make a detailed report, a copy of which will be allowed to the applicant, suggesting the average rate per acre at which payment should be made for such trees. Such officer, in valuing the timber, shall have regard to its present market value on the spot, and to the local circumstances of the case, the accessibility of the grant, and the prospect of markets for timber becoming available during the currency of the lease. The Conservator will carefully examine the report, and forward it to the Deputy Commissioner with such remarks and alterations as he may think necessary. If the Deputy Commissioner, on receipt of the Conservator's decision, sees reason to object to the proposed rate per acre, he may refer the matter to the Commissioner, who shall take the orders of the Board of Revenue and of Government on any point on which he and the Conservator may eventually differ.

19. **Opposing claim, how to be disposed of.**—If any claim or objection be preferred under Act XXIII of 1863, the Deputy Commissioner will proceed to dispose of the same in accordance with the provisions of that Act.

Survey.

20. **Survey, how to be made.**—The officer who made the enquiry provided for by rules 14 to 16 will, on receipt of an order to that effect from the Deputy Commissioner, proceed to point out to the surveyor the boundaries of the land applied for, and such prominent features in it as may be useful for the purposes of the survey, and which should, in his opinion, be entered in the preliminary lease as hereinafter provided. These will be entered in a list which will be made over to the surveyor under the officer's signature.

21. **Preparation of map.**—The surveyor will then proceed to make the survey and put up such temporary boundary marks as are necessary for that purpose. He must prepare a map showing—

- (a) All natural features of the country lying within the boundaries as fixed by the officer who made the enquiry under rules 14 to 16, *e.g.*, *bds.*, streams, forest clumps, etc.
- (b) Such features of the country lying outside the boundary of the land to be surveyed as may serve to identify the latter and connect it with the revenue survey or other existing map.
- (c) The total area within the boundaries after deduction of areas for roads or other Government reserves, jotes, etc., and the net area of the grant.
- (d) Points at which permanent or other marks should be erected by the lessee.

The surveyor is bound to bring to the notice of the Deputy Commissioner any fact which may come to his knowledge in the course of the survey rendering it advisable that the land he is surveying should not be granted under these rules. He is particularly bound to bring to notice any need for public roads across the lands he surveys; and if the Deputy Commissioner concurs with the surveyor in this matter, the road or roads should be marked off on the ground and on the map, and the area to be occupied thereby should be deducted from the rent-paying area of the grant.

22. **Scale of map.**—The map should ordinarily be on a scale of 16 inches to the mile. If possible, the surveyor's field-book should be copied at the back of it. If not, a copy of the field-book should be attached to or accompany the map. If the map be made originally in the vernacular, the Deputy Commissioner will cause it to be translated into English.

23. **Checking of map.**—On the map being completed, it must be checked by an officer appointed by the Deputy Commissioner for the purpose. If found to be incorrect, it will be amended by the surveyor in conjunction with the officer above mentioned. If found to be correct, it will be laid before the Deputy Commissioner with the report of the officer who made the preliminary enquiry under rules 14 to 16, and with all other papers connected with the case and will be signed by the Deputy Commissioner and the applicant.

24. **Consideration of application after survey.**—The Deputy Commissioner will then proceed to consider the application. A date for the purpose must be previously fixed by him, and due notice of it given to the applicant or to his authorised agent.

25. **Rejection of application and refund of deposit for survey.**—The Deputy Commissioner shall have power to reject an application at any stage of the proceedings under the rules, if he sees reason to do so, refunding in such case to the applicant the deposit made by him on account of survey, *minus* such an amount as it may seem to the Deputy Commissioner fair to retain in consideration of the expenses incurred. The Deputy Commissioner is authorised to reject an application when he does not consider that there is a *bona fide* intention on the part of the applicant to cultivate in tea the land applied for, or when it appears desirable to reserve the land for cultivation other than tea, or to preserve any forest standing on it. An appeal against every such order of rejection shall lie to the Commissioner of the Division, if preferred within 60 days of the date of the order.

Preliminary leases.

26. **Grant of preliminary lease and payment for forest trees.**—If the Deputy Commissioner grant the application, he will without delay grant the applicant a lease in Form B annexed and call upon him to execute a counterpart thereof, which must be registered, and to pay for forest trees the sum assessed under rule 18. Payment for these may be made by instalments, with the sanction of the Board of Revenue, which will only be given when the Board is fully satisfied of the good faith and solvency of the applicant. In such case the dates and amounts of the instalments shall be endorsed upon the lease, and the lessee must covenant that, in the event of his surrendering or abandoning the lease, all outstanding instalments shall be forthwith recoverable from him, whether the timber on the grant has been cut by him or not; but he shall have no further right to fell or remove timber from the grant.

27. The Board reserves to itself the right—

- (a) to enter conditions in the lease controlling the establishment and management of markets and *hats* within the area leased,
- (b) to enter conditions in the lease prohibiting forms of cultivation in specific areas, which might endanger the stability of the soil,
- (c) to sanction such changes in or additions to the prescribed form of lease as may be necessary for any specific case,
- (d) to dispense with preliminary leases in special cases or for special areas.

28. **Rates of rent.**—The rent payable for preliminary leases shall be at the following rates:—

Year of entry till 31st March following	...	Nil.
1st full year from April 1st	...	Nil.
2nd year	... annas	3 per acre.
3rd "	...	6 "
4th "	...	9 "
5th "	...	12 "

29. **Entry of lease in the Tauzi Roll and Register 32.**—Every lease granted except as covered by the rules for amalgamation of grants shall be entered as a separate Government estate in the Tauzi Roll and in Register 32.

Demarcation and erection of boundary marks.

30. **Erection of boundary marks.**—When granting the lease, the Deputy Commissioner shall also direct the lessee to mark out the land leased, within three months of the granting of the lease, in such manner as may be directed, and by erecting boundary marks at the points indicated on the map. These boundary marks may be of masonry, or of stone, or of iron, of such shape and dimensions as the Deputy Commissioner may direct.

31. **Their rectification.**—On the expiry of the three months from the date of granting the lease, the Surveyor shall test the correctness of the boundary lines, and ascertain whether the boundary marks have been erected and are in their proper places, and report the result to the Deputy Commissioner, at the same time pointing out to the lessee or his representative by written notice, any mistakes or omissions that may be found. If the mistakes or omissions are not rectified or supplied by the lessee or his representative within 60 days of the receipt of such notice, the lessee or his

representative shall be liable to a fine, not exceeding Rs. 50 per day, from the date of the expiry of such notice till the requirements of the notice have been complied with. If, at the expiration of 30 more days, he fails to rectify the mistakes and omissions, the Deputy Commissioner may direct that such rectification shall be carried out, and may recover from the lessee the cost of so doing.

Recovery of costs, etc.

32. Fines, etc., how to be recovered.—Fines, costs, or any other money that may become due from applicants or lessees to Government under rules 13, 14, 26, 31 and 35 shall be realisable as public demands.

Preliminary possession.

33. Preliminary possession by grantees.—Whenever, after receipt of an application, as provided for in rule 6, and after making the enquiries prescribed in rule 14, the Deputy Commissioner shall be of opinion that there is no *prima facie* objection whatever to the grant under the rules of the land applied for, he may put the applicant in preliminary and provisional possession of any area not exceeding one-eighth of the estimated area of the land applied for, with the object of enabling the applicant to make preparations for commencing cultivation and getting the land in order; provided that the applicant, before obtaining such preliminary possession, shall have cleared the boundaries and erected such temporary boundary marks round the whole of the area applied for as the Deputy Commissioner may direct, and that the amount of all estimated charges incurred in connection with such preliminary occupation shall have been deposited by the applicant; provided further, that the applicant shall engage in writing to pay the cost of any trees felled at such rate as may be determined by the Forest Department after inspection of the land under rule 18, and provided further, that the applicant shall take on himself all risk of loss occasioned by other claims being preferred to the land or by his application being eventually rejected or from any other cause whatsoever. Such preliminary and provisional possession is not to be regarded as fixing the date of entry upon the grant.

34. Order for giving preliminary occupation.—The order for, and conditions of, such preliminary occupation shall be in Form A annexed, and shall be addressed to an officer appointed by the Deputy Commissioner. A copy of the order shall be delivered to the applicant at the time of giving preliminary possession by the officer who gives it, the officer signing and dating it then and there. The original order shall be signed by the applicant on the date he receives possession in acknowledgment thereof, and shall be forwarded by the officer with his report written on the back to the Deputy Commissioner for record in his office.

Transfers of applications.

35. Transfer of application.—If any transfer of an application for land is desired before the grant of the preliminary lease, and if such a transfer is allowed, it must be registered in the Deputy Commissioner's office within 21 days of the issue of the order allowing the transfer, or within three months if the deed be executed out of India, and a fee of one rupee an acre must be paid by the transferee. No transfer, however, will be allowed unless the transferee would be eligible as an applicant under rule 7 or as holder of a second grant under rule 11.

SECTION. II.

Rules for conversion of jote lands for tea cultivation.

36. Applications for conversion.—No application which involves the conversion of jote lands shall be entertained, unless the applicant has obtained the previous sanction of Government through the Board of Revenue to the purchase and amalgamation of the jotes. The application for such sanction shall be submitted, with court-fee stamp of Re. 1 affixed, to the

Board of Revenue through the Deputy Commissioner and the Commissioner, and it shall specify the following particulars :—

- (a) The name or names and address or addresses of the applicant or applicants, and of his or their authorised agent, if any.
- (b) The area, situation and boundaries of the jotes whose amalgamation is applied for. A copy of the last settlement map of the jotes in question shall be furnished.
- (c) If the jotes to be amalgamated are intended to form part of an existing tea grant, the tauzi number of the grant and its distance from the jotes should be mentioned.
- (d) The name or names of the parties from whom the applicants intend to purchase the jotes should be mentioned, specifying the reason why the former are selling them.

37. On receipt of such an application the Deputy Commissioner shall make a full and detailed enquiry as to the following matters :—

- (a) the suitability of the land for tea cultivation ;
- (b) whether the applicants have sufficient capital at their disposal to start a tea garden ;
- (c) whether the proposed transfer is a voluntary or forced transaction ;
- (d) whether the price which the applicants propose to pay for the land is fair ;
- (e) whether adequate compensation will be paid to the sub-tenants on the land, if any ;
- (f) whether there is any specific objection to the establishment of a tea garden in the locality ;
- (g) whether the supply of food crops in the area is sufficient to justify the conversion of jote lands.

38. **Application for purchase and settlement.** Where the application takes the form of a request to sanction the purchase of jote lands combined with a request to settle other neighbouring khas lands with the applicants, the Deputy Commissioner's enquiry should be on the same lines as those described in the previous rule, *i.e.*, the suitability of the khas land for tea cultivation ; the provisions of section 1, rule 2, should also be considered at the time of making the enquiry as to the circumstances of the jote lands.

39. **Report to Board.**—After completing his enquiry the Deputy Commissioner will submit a detailed report along with the application to the Board of Revenue through the Commissioner. The orders of the Board or Government will similarly be conveyed to the Deputy Commissioner through the Commissioner.

40. **Procedure when the application is sanctioned.**—If the application be sanctioned the applicant shall again apply with a court-fee stamp of 8 annas to the Deputy Commissioner. The application shall, among other particulars, state the number and date of the Government order sanctioning the purchase and amalgamation of the jotes. Such an application shall be treated, in other respects, as an application for the lease of waste lands for the cultivation of tea and the same procedure as is laid down for the lease of waste lands shall be followed except as otherwise provided in these rules.

41. (a) **In the case of the formation of a separate grant.**—If the application is for the formation of a separate grant, the procedure laid down for the lease of waste lands for tea cultivation shall be followed in its entirety except that the lease shall be in the renewed lease form and the rate of rent shall be fixed by the Board of Revenue on the report of the Deputy Commissioner, but shall not exceed the rate of rent per acre paid in the neighbourhood at the time of lease for the highest class of land under ordinary cultivation.

(b) **In the case of an amalgamation with existing grant.**—If the application is for amalgamation of the jotes with an existing grant, the applicant shall surrender his lease for the existing grant, and a new lease will be given to him in place of the old, showing the changes in the area and the increase of revenue payable in consequence thereof. The new lease will be in the form of lease for the existing grant, *i.e.*, in the preliminary or renewed lease form, as the case may be, and the rate of rent for the converted jote land shall be the same as in the old lease.

42. **Tauzi procedure.**—If the converted jote lands are amalgamated with an existing grant, intimation shall be conveyed to the Tauzi Department of the

alteration in the revenue of the grant and to the proper Revenue officer for abatement of rent due on account of the converted jotes.

If the converted jote lands form a new grant, intimation shall be conveyed to the Tauzi Department for assigning a tauzi number to the new grant in the tauzi roll and to the proper Revenue officer for abatement of rent due on account of the converted jotes.

SECTION III.

Rules for the maintenance and renewal of tea leases.

Transfers and amalgamations.

43. **Sanction and regulation.**—Lessees are not permitted to transfer, club or amalgamate their grants without the formal sanction of the Deputy Commissioner: no transfer shall, however, be sanctioned unless the clearance conditions of the lease have been fully carried out by the transferor. All such transfers or amalgamations of titles must be registered in the Deputy Commissioner's office under the provisions of the Land Registration Act, VII (B.C.) of 1876 (*vide* Part I, Chapter I, rule 12).

44. **Entry of amalgamated grant in Tauzi Roll.**—When two or more grants are amalgamated they will appear on the Tauzi Roll under one entry, retaining the tauzi number of the largest grant [*vide* rule 19(vi), Chapter III, Tauzi Manual, 1918.]

45. **Conditions of amalgamation.**—When an amalgamation of grants held under preliminary leases has been sanctioned by the Deputy Commissioner, and duly registered, the percentage of clearance required by the terms of the lease shall be calculated on the amalgamated area. Unauthorised amalgamations shall subject the lessees of forfeiture to all rights in the lands so amalgamated.

Preservation of boundary marks.

46. **Maintenance of boundary.**—The lessee shall maintain the boundaries of the grant clear of jungle and all the boundary marks in good repair: he shall clear the boundaries of jungle at least once a year, not later than the end of February.

47. **Preservation of boundary marks.**—If upon any inspection being made it shall be found that, owing to the neglect of the lessee, the boundary lines and boundary marks of his grant have either never been cleared and erected in accordance with instructions received by him, or have been allowed to fall out of repair or become covered with jungle in such a manner that, without a resurvey of the entire boundary line or a portion thereof, the exact portion of such boundary marks or lines cannot be ascertained, the Deputy Commissioner may direct that such resurvey be made and may recover from the lessee such sum, not exceeding one rupee eight annas per acre of the grant, as may suffice to defray the cost of such resurvey.

48. **Inspection of boundary marks.**—The Deputy Commissioner shall himself occasionally inspect and shall arrange for the regular inspection of all boundary lines and marks required to be maintained and erected under the terms of the lease. The result of these inspections and the general condition of the boundary lines and marks shall be reported in the Land Revenue Administration report.

49. **Repair of boundary marks.**—Should any boundary lines or marks be found out of order, the Deputy Commissioner shall issue a notice to the lessee or his representative, requiring him to place the same in order within 30 days of the receipt of the said notice; on his failing to do so the Deputy Commissioner shall cause the same to be put in order, and shall recover from the lessee or his representative the cost of so doing.

Surveys.

50. **Excess area.**—If the lessee is at any time found by survey or otherwise to be in possession of land in excess of the area for which he has paid rent, he shall pay rent, at the rates payable by him for the grant itself, for such excess land, whether it be within or without the boundaries, described in the lease or map, from one year after he entered on the

occupation of the grant or any portion of it, unless it is established to the satisfaction of the Deputy Commissioner that no possession of the excess land was taken until after the grant of the renewed lease; in the latter case rent shall be payable from the date of the expiry of the preliminary lease; provided, however, that such unauthorised occupation of excess land and payment of rent therefor, shall give the trespasser no right to continued occupation, and the Deputy Commissioner shall be entitled to recover possession of the excess area. In deciding whether the trespasser should be left in occupation, he should pay particular attention to the provisions of section 1, rule 2.

51. **Resurvey or resettlement.**—In the absence of specific orders of the Board of Revenue to the contrary, the renewal of a grant shall always be preceded by a detailed survey of the boundaries and the preparation of a new map, on which all boundary lines and marks shall be clearly shown; such further details as the Deputy Commissioner may think necessary shall also be shown on the map. The full cost of such survey and map shall be borne by the lessee, who shall deposit the estimated cost in advance at a rate not exceeding Re. 1 per acre. The Board of Revenue will not ordinarily require a fresh survey where no alterations in boundary have been reported and where the boundary marks are in proper order provided that a map already exists prepared under the authority of Government within the last 15 years. A private survey can only be accepted subject to check by an officer deputed by the Deputy Commissioner.

Recovery of costs, fines, etc.

52. **Realisation of costs and fines, etc.**—All costs or fines payable under rules 43, 47, 49, 50 and 51 that may become due from lessees or their representatives shall be realisable as public demands.

Preliminary procedure for resettlement.

53. **Maintenance of Register 32.**—Under the provision of rule 29 all leases for tea cultivation are entered under separate tanzi numbers in Register 32, the rules for the maintenance of this register must be strictly followed, as it enables the Deputy Commissioner to see on what date the lease of each grant in his district expires.

54. **Procedure to ensure resettlement on expiry.**—Resettlement of all tea grants, whether under the present or former rules, shall be included in the annual general programme and estimates for resettlements. The Deputy Commissioner shall be responsible for taking steps in due time either for the termination of tea grant leases on their expiry or for resettlement in accordance with the rules in force. It must not be forgotten that a resettlement necessitates a fresh survey, and the appointment of additional staff, and accordingly requires time.

55. **Summary settlements.**—If for any reason the proceedings for resettlement cannot be concluded before the first latest date of payment after the expiry of the current lease, provided that the delay is not due to the neglect or obstruction of the lessee, the existing lease should be renewed summarily for a period of one year on existing conditions. The reason for the failure to renew the lease in due time should be reported to the Commissioner.

Renewal leases.

56. **Conditions of former lease to be maintained.**—The terms of the resettlement of tea grants must be based on the conditions laid down in the existing leases, provided that nothing in these rules shall be held to prevent the addition of such clauses in the renewed lease as may be deemed necessary and are not inconsistent with the law and rules or the express conditions of the grant. Such additional clauses, however, shall not have retrospective effect.

57. **Type of renewal lease.**—A standard form of renewal lease is given in Form C. This form must be used invariably in the cases of renewals of preliminary leases granted under the rules of 1919, and should be adopted with necessary modifications for the renewal of leases originally granted under earlier rules. The counterpart, which the lessee should be called upon to execute, must be registered under the Indian Registration Act.

58. **Refusal of renewal on breach of conditions.**—Where the lessee or his representative has failed to observe any of the essential conditions of the

lease, he is not entitled as of right to resettlement. The clearance of the percentage of area as required by clause 4 of the preliminary lease (Form B) is such an essential condition, and resettlement should not be allowed where there has been a failure to observe the clearance clauses, as companies and individuals cannot be permitted to take up large quantities of land merely to hold until it suits them to cultivate.

59. Condonement of breach of conditions.—Where the breach of any essential condition of the lease has been condoned, the lessee shall not be entitled to the benefit of any special conditions or privileges contained in his lease on renewal, but shall be required to accept the terms and conditions in the prescribed form of renewal lease (Form C).

60. Respect of special conditions.—Where all the essential conditions of the lease have been observed, the lessee is entitled to the benefit of any special privileges due to him on renewal according to the terms of his lease, even though they are inconsistent with the terms of the prescribed form of renewal lease. These privileges must be duly respected, but in drawing up the new form of lease regard must be had to the provisions of rules 56 and 57 above.

61. Term of leases and rate of rent.—The ordinary term for renewal of tea leases shall be a period of 30 years; the rate of rent shall not exceed the rate paid in the neighbourhood at the time of renewal for the highest class of land under ordinary cultivation, provided that in no case shall the average rate of rent on the entire area of the land leased be less than rupee one per acre.

62. Liability to payment of cesses.—The lessees shall pay all cesses, such as road and public works cesses, at the rates fixed under the law, and shall be liable to pay any other cesses that may subsequently be imposed by law, in addition to the rent assessed.

63. Sanction of Board for renewal of leases.—All renewals of tea leases require the sanction of the Board of Revenue. To obtain the necessary sanction a report will be submitted by the Deputy Commissioner through the Commissioner; the report should contain the following particulars:—

- (a) Description of the survey required under rule 51.
- (b) Report on condition of boundary lines and marks.
- (c) Steps taken to ensure renewal of lease in due time (rules 54 and 55).
- (d) Proposed rate of rent and method of assessment.
- (e) Copy of existing form of lease.
- (f) Proposed renewal form of lease (if not in prescribed form).
- (g) Reasons for action taken for breach of conditions of lease (rules 58 and 59).
- (h) Explanation of clauses in proposed lease differing from the prescribed form.

64. Appeals.—An appeal may be made to the Commissioner against any order of the Deputy Commissioner inflicting a fine or other penalty for a breach of the preliminary or renewal lease and an appeal may be made to the Board of Revenue against any order of the Commissioner ordering resumption of the land or the forfeiture of the lease.

The lessee may at any time demand that an inspection and measurement be made of the area cleared and under cultivation. the expiration of such term, it is found that 15 per cent. of the total area held under the lease has been brought under cultivation by means of good husbandry and actually bears tea plants the lessee shall be entitled to the renewal of the lease for a further period of 30 years and to renewals for similar periods in perpetuity, subject to the rules and the terms and conditions of the renewal leases, and to such clauses as the Local Government may from time to time find it necessary to add on the renewal of a lease; provided that such additional clause shall not be inconsistent with the law or the express conditions of the grant, and shall not have retrospective effect.

2. The draft will be taken into consideration on or after the 2nd July 1919, and any objection or suggestion received by the undersigned before that date will be duly considered.

Draft amendment.

Delete items 13 and 15 and read item 14 as item 13.

Add as item 14.

14. (1) During the period of closure of the Tolly's Nala at Samookpota, boats laden with firewood will be allowed to proceed to or from the river Bidyadhari or the Bhangore khal through the Circular or Kristopur Canal and the Tolly's Nala *via* Kidderpore on payment of two rupees per hundred maunds of measured maundage for passage through these canals. All other cargo boats will pay a rate of one rupee and twelve annas per hundred maunds of measured maundage.

(2) Boats plying under this concession will not be allowed either to load or to unload their cargo along the Circular Canal the Kristopur Canal, or the river Hooghly. Infringement of this rule will render such boats liable to the ordinary tolls in force for the Circular Canal.

(3) (a) Boats laden with cargo other than firewood may pick up extra cargo, either in the Kristopur Canal, the Circular Canal or the river Hooghly. The toll collectors at Chitpur, Kristopur and Dhappa, respectively, will, in that case, assess and collect the extra toll due on the cargo at twelve annas per hundred maunds, provided the maundage of the boat does not exceed that when it originally entered at Dhappa or Kristopur.

(b) If there is an excess at the time of leaving Tolly's Nala a rate of two rupees and eight annas per hundred maunds will be charged on the extra cargo at Kidderpore. This will entitle the boat to pass beyond Dhappa or Kristopur without any further payment.

(c) If cargo is picked up either in the Hooghly or in the Circular or Kristopur Canal the extra toll on the extra amount will be charged at the rate of one rupee and twelve annas per hundred maunds.

(4) For the purposes of reckoning demurrage charges under item 11 of this schedule on the boats herein defined two extra days will be allowed over and above those provided for vessels plying in the Tolly's Nala.

[16th April 1919.]

WHEREAS the raising or keeping of a standing army within the United Kingdom of Great Britain and Ireland in time of peace, unless it be with the consent of Parliament, is against law:

And whereas it is adjudged necessary by His Majesty and this present Parliament that a body of forces should be continued for the safety of the United Kingdom and the defence of the possessions of His Majesty's Crown, and that the whole number of such forces should consist of two million six hundred and fifty thousand, including those to be employed at the depôts in the United Kingdom of Great Britain and Ireland for the training of recruits for service at home and abroad, but exclusive of the numbers actually serving within His Majesty's Indian possessions:

And whereas it is also judged necessary for the safety of the United Kingdom, and the defence of the possessions of this realm, that a body of Royal Marine forces should be employed in His Majesty's fleet and naval service, under the direction of the Lord High Admiral of the United Kingdom, or the Commissioners for executing the office of Lord High Admiral aforesaid:

And whereas the said marine forces may frequently be quartered or be on shore, or sent to do duty or be on board transport ships or vessels, merchant ships or vessels, or other ships or vessels, or they may be under other circumstances in which they will not be subject to the laws relating to the Government of His Majesty's forces by sea:

And whereas no man can be forejudged of life or limb, or subjected in time of peace to any kind of punishment within this realm, by martial law, or in any other manner than by the judgment of his peers and according to the known and established laws of this realm: yet, nevertheless, it being requisite, for the retaining all the before-mentioned forces, and other persons subject to military law, in their duty, that an exact discipline be observed, and that persons belonging to the said forces who mutiny or stir up sedition, or desert His Majesty's service, or are guilty of crimes and offences to the prejudice of good order and military discipline, be brought to a more exemplary and speedy punishment than the usual forms of the law will allow:

And whereas the Army Act will expire in the year one thousand nine hundred and nineteen on the following days:

- (a) In the United Kingdom, the Channel Islands, and the Isle of Man, on the thirtieth day of April; and
- (b) Elsewhere, whether within or without His Majesty's dominions on the thirty-first day of July:

Open General Licence for export of List "C" goods to Norway, Sweden, Denmark, Holland and Switzerland.

An Open General Licence has been issued allowing goods on Section "C" of the Prohibited List, including those shown in Appendix No. 1, (above), but not including

*Many Goods on the above Lists are already on List A or B.

any goods contained in Section "D" (page 448), to be exported freely by freight from this country to Norway, Sweden, Denmark, Holland and Switzerland, on the following terms.—

Norway and Sweden.—Individual guarantees in respect of exports are no longer required, but the goods must be consigned to the appropriate import associations. In order that the method of consignment may be checked, an arrangement has been made whereby shippers are to forward the Customs Shipping Bills to the Export Licence Department, 4, Central Buildings, Westminster, S. W. 1 (in envelopes marked "Shipping Section"), for approval. The Shipping Bills will be amended, if necessary, and returned to the shippers stamped "Approved." Upon the production of approved Shipping Bills shipment will be allowed by H. M. Customs without any form of guarantee, subject to the usual Customs formalities. This procedure will not apply to any licences which have already been issued or which may hereafter be issued in special cases.

Denmark.—The usual guarantees must be produced to the Customs at the time of shipment. The guarantees need not be produced to the Customs in any case where individual licences have been or may be issued in special cases.

Holland.—All goods may be consigned to the Netherlands Oversea Trust for account of the sub-consignee, without the prior production of an N. O. T. certificate, though exporters who actually hold certificates should hand them to the Customs at the time of shipment. The same procedure will apply to outstanding licences.

Switzerland.—All consignable goods may be consigned to the Société Suisse de Surveillance Economique for account of the sub-consignee without prior production of any form of certificate though exporters who actually hold certificates should hand them to the Customs at the time of shipment. The same procedure will apply to outstanding licences.

In cases where the associations specified above refuse generally or specifically to accept consignment and exporters make a declaration to the Customs to this effect, goods may be consigned to the Inter-Allied Trade Committees in Christiania, Stockholm, Copenhagen or The Hague, on account of the sub-consignee. In the case of Switzerland, consignment of such goods should be made to the British Legation at Berne. The local Inter-Allied Trade Committees (or the British Legation as the case may be) will endorse the Bills of Lading (without any financial liability) on receipt of satisfactory guarantees from the consignee.

Further information will be given as soon as it is known which of the above-mentioned organisations are prepared to accept consignment. Meantime, consignors should get into touch with consignees in respect of goods which will be ready for shipment in the next few weeks, with a view to ascertaining whether the appropriate association will accept consignment or not.

APPENDIX No. 3.

SAMPLES.

An open general licence has been issued which permits the free export of all *bona fide* samples of prohibited goods to all non-enemy destinations, and to enemy territory with which trade is now permitted (*see page 448*). Samples exported under this licence may be used only for genuine sample purposes, i.e., for obtaining orders from foreign buyers, and may not be sold except with the written consent of the Export Licence Department, but such consent may be dispensed with when it is desired to sell the articles in the country of destination after they have fulfilled their purpose as samples. Exporters will be required to satisfy the Customs Authorities that the goods presented for export under this licence are *bona fide* samples, and to make a declaration to that effect on the relative shipping documents.

URGENT ORDERS.

The Board of Trade, Export Licence Department, announces that, in collaboration with the Department of Overseas Trade, an arrangement has been made whereby firms receiving orders which require immediate acceptance may telegraph details of any such order to the Department of Overseas Trade in order to ascertain whether a licence will be granted for the export of the goods if the order is accepted.

In the event of an applicant being promised a licence he will be enabled to deal with the order straightway with the knowledge that upon application being made in the proper form to the Export Licence Department the licence will be granted.

The telegrams should be addressed to "Orders, c/o Advantage, Stock, London." They should give in each case in addition to the name and postal or telegraphic address of the applicant the quantity and description of the goods comprised in the order and the name and address of the ultimate consignee if the goods are destined for a neutral country. In the case of orders from Allied or British Territory in the occupation of troops of the Associated Governments, the consignee need not be stated; and it will be sufficient merely to give the country of destination. A reply of 24 words (s.1/3) must be prepaid.

Applicants are requested in their own interest to confine their enquiries to orders needing a very urgent decision, since the fewer the enquiries the more promptly can answers be given.

Any subsequent correspondence that is necessary in connection with the telegraphic enquiries should be addressed to the Comptroller General, Department of Overseas Trade (Export Facilities Section), 73, Basinghall Street, E. C. 3.

Amendments.

(1) In the third line of the Bengal Government notification of the 11th February 1886, issued under clauses (b), (c), (d), (e), (f), (h), (i), (g), (s) and (t) of section 138 of the Bengal Local Self-Government Act of 1885, after the figures "138" insert the letter and brackets "(a)".

(2) Before rule 76 of the said rules *insert* the following rules under the heading "Election of Chairman or Vice-Chairman" as rules 75A, 75B, 75C, 75D and 75E, respectively :—

"75A. When any orders under section 22 or section 29, sub-section (1) of the Bengal Local Self-Government Act of 1885 have been received by a District Board, a special meeting of the Board, at which there shall be a quorum, shall be held for the election of a Chairman within one month,—

(a) in the case of a newly constituted or reconstituted District Board from the date on which the names of the elected members and the names or official designation of the appointed members of the Board shall have been published in the *Calcutta Gazette*, and

(b) in any other case, from the date of the receipt by the Board of the said orders directing the election of a Chairman.

75B (1) Whenever a meeting of a newly constituted or reconstituted District Board is held for the purpose of electing a Chairman, it shall be presided over by a member of the District Board, who shall be elected by the members of the Board for conducting the election. The President in such cases must be duly proposed and seconded and must not be a candidate for the office of Chairman.

(2) Any meeting of a District Board other than a newly constituted or reconstituted Board held for the purpose of electing a Chairman shall be presided over by the outgoing Chairman, or in his absence, or if the period of office of the Chairman has expired, by the Vice-Chairman :

Provided that should the outgoing Chairman be himself a candidate for election, the meeting shall be presided over by the Vice-Chairman if he is not also a candidate for election :

Provided further that if there is no Chairman, and the Vice-Chairman is a candidate for election, and also, if the Chairman and Vice-Chairman be both candidates for election, the meeting shall be presided over by a member of the District Board other than the Chairman or Vice-Chairman, who shall be elected by the members of the Board for the purpose of conducting the election of the Chairman. The President in such case must be duly proposed and seconded, and must not be a candidate for the office of Chairman.

75C. If only one member is proposed and seconded as President, he shall be deemed to be duly elected as such. If more than one member is proposed and seconded, the members present shall decide the election by vote. The votes may be taken by voices or by show of hands.

75D. If the votes for two or more members proposed as President of the meeting are equal, then the selection of one of them shall be decided by lot.

75E. The election of the Chairman of the District Board shall proceed as follows :—

(a) Any member present may propose a candidate either by name or by virtue of his office for the office of Chairman.

(b) No candidature shall be taken into consideration unless it has been seconded by a member other than the proposer.

(c) If one duly nominated candidate duly stands for election, the President shall forthwith declare such candidate to be elected.

(d) When the names of all the candidates proposed and seconded have been ascertained, the President shall hand to each member a voting paper in which will have been entered up the names of the candidates who have been duly nominated, and shall ask each member to record his vote by placing the mark X opposite the name of the candidate whom he prefers.

(e) The voting paper shall be invalid if the mark X is placed opposite the name of more than one candidate, or if it is so placed as to render it doubtful to which candidate such mark is intended to apply.

(f) When the voting has been completed, each member shall sign his voting paper and shall hand the same to the President. Without such signatures the voting paper shall be invalid.

(g) The President shall have the right of participating in the election of the Chairman and shall similarly record his vote.

- (h) The President, as soon as all the voting papers have been delivered to him, shall produce them openly and read them, and shall count the votes. The President shall reject any voting paper which is invalid or which has been irregularly filled in, and his decision shall be final.
- (i) When the counting of the votes has been completed, the President shall declare the candidate to whom the largest number of votes has been given to be elected Chairman.
- (j) In the case of an equality of votes the President shall have a casting vote.
- (k) The President shall forthwith report the result of the election to the Commissioner for submission to Local Government for confirmation.
- (l) Every election made under these rules shall be subject to the approval of the Local Government.
- (m) A quorum for the purpose of these rules shall consist of half the members of the District Board."

(3) From the first sentence of rule 76 *delete* the words "and, if the Lieutenant Governor has so directed, shall also elect one of their number to be Chairman."

(4) From the second sentence of the said rule *omit* the words "or Chairman," "or the Chairman" and "as the case may be."

(5) *Re-number* rule 76 as rule 76, sub-rule (1), and *insert* the following as sub-rule (2):—

"(2) The election of the Vice-Chairman shall be made in the same manner as that of the Chairman."

DARJEELING, THE 7TH JUNE 1919.

RESOLUTION No. 330T.—M.

READ—

The reports on the operations of the Calcutta Improvement Trust for the years 1915-16, 1916-17 and 1917-18.

THE Board of Trustees for the Improvement of Calcutta has now been at work for more than six years. A Resolution on its work during the first three years was recorded in 1915, and it is now proposed to review briefly its operations during the subsequent three years. The work of the Trust

during this period was retarded by several adverse circumstances. Its investments in Government securities were depreciated by the war; engineering materials not only rose greatly in price, but were frequently almost unobtainable; the floatation of loans, on which the Trust must rely to finance some of its most costly schemes, was impossible. Another disturbing factor was the prolonged litigation which arose concerning the right of the Trust to acquire surplus lands. In spite, however, of these difficulties, the Trust made steady progress with its important task. Large areas which were formerly congested and insanitary slums have now been transformed beyond recognition; and a system of main streets for Calcutta proper has been adopted, and for the most part sanctioned by Government, in the form of either improvement schemes or alignments.

2. **Improvement schemes.**—Of 16 improvement schemes submitted to Government during the last three years, 12 have received sanction, one is under consideration, while three have been abandoned or modified. The Surribagan scheme has been a striking success. The Trust intervened at an opportune moment, when bustee conditions were beginning to give way before the speculative builder, and the high prices realized for surplus lands enabled it to recover the cost of the scheme, which has converted a congested insanitary area into a good residential locality. Equally noticeable are the changes effected by the Shambazar bridge road and Cornwallis Street widening schemes at the northern extremity of the city, by the widening of Old Post Office Street, by the conversion of Russa Road into a splendid highway, by the transformation effected in Bhowanipur, and by the progress made with the great north and south thoroughfare (Central Avenue) which carries on the design of the town planners of 1856. It is an interesting fact that, whereas the thoroughfare, 3 miles long, which was planned in that year, but ended with the first instalment known as Halliday Street, was constructed at a cost of 11 lakhs, the acquisition of land for the Central Avenue will alone involve an expenditure of some 200 lakhs gross and 50 lakhs nett. It is unnecessary to describe the details of this great project, but some reference must be made to the controversy which has centred round the linking up of the Avenue with Chowringhee. No less than eight designs were prepared by the Chief Surveyor to the Trust, and the Board eventually submitted for sanction one of which Government could not approve, as it was inferior, as regards both facilities for traffic and architectural effect, to a plan under which the Avenue passes on both sides of the Dharamtollah mosque, and an alternative plan based on the views of Mr. Lancheester, the town-planning expert, in which the road is aligned to the west of the mosque. The Board was accordingly requested to give further consideration to the two latter plans.

One of the most ambitious schemes of the Trust is that for the construction of a fine thoroughfare to connect the Howrah bridge with the centre of commercial Calcutta. The estimated nett cost of the scheme is nearly 75½ lakhs, and it will be necessary to raise funds by the issue of debentures. In the meantime, the alignment of the proposed public street has been published in order to prevent the erection of new buildings on the road-line.

3. **Squares and parks.**—The Trust resolved in 1914 to earmark 10 lakhs for the purpose of forming open spaces and squares in congested areas, and three schemes have now been sanctioned, viz., the Ripon Street triangle, the Marcus Square extension and the St. James' Square. The Shambazar Park scheme is a project of greater importance, providing as it does for a park extending over 53 bighas, which, in combination with the fringe area scheme of the Corporation, will provide splendid recreation grounds for the youth of northern Calcutta.

4. **Improvement of Barabazar.**—The report for 1916-17 points out that the improvement of Barabazar, the Indian business centre of Calcutta, is in many ways a problem by itself. Lofty buildings, into which light and air in many cases hardly penetrate, abut on narrow roads thronged with heavy cart traffic, or on noisome gullies, which defy the efforts of the conservancy staff. The opening up of wide streets and the abatement of insanitary conditions are required both on grounds of public health and in order to facilitate the operations of trade. The high price of land, however, the

large vested interests involved, and the substantial character of the buildings render an improvement scheme for this area one of peculiar difficulty. Both the Board and the Corporation have carefully examined the problem, and a thorough survey of the buildings in the area has been carried out by the Trust. It is reassuring to learn that the result of these enquiries is to indicate that "improvement schemes can be carried out in Barabazar without incurring prohibitive expenditure, and that the best method of dealing with the problem is to carry out such schemes under the powers conferred by the existing Act".

5. Extension of operations to suburban municipalities.—"Howrah and the suburban municipalities," writes Mr. Bompas in the report for 1915-16, "are now much in the state in which the north of Calcutta was 60 years ago: they will eventually have to be furnished with main thoroughfares and adequate open spaces. It is to be hoped that Calcutta's lesson of the costliness of delay will be laid to heart." Accordingly, the Trust has had under contemplation several schemes for developing the neighbouring municipalities in order to provide for the expansion of Calcutta and render them fit to receive the overflow of its population. A scheme for the creation of a garden suburb in Cassipore-Chitpur has been prepared, but has had to be held in abeyance owing to a proposal to align the Grand Trunk Canal through the area selected by the Trust for development. An improvement scheme has been prepared for Maniktollah, which will, when properly drained, form the most natural area for the expansion of northern Calcutta. The question of extending its operations to Howrah has been the subject of prolonged discussion by the Trust, which has come to contradictory decisions on the subject. In March 1916, it resolved by a majority of 7 to 2 that its operations should be extended to Howrah. A rough scheme and estimate were then prepared and submitted to the Board of Trustees, and after considering them it resolved by a majority of 6 to 5 against an extension of the Act to Howrah. The proposal has, however, been welcomed by the Municipal Commissioners of Howrah. In view of the urgent necessity of improving Howrah and preventing the growth and perpetuation on the west bank of the Hooghly of conditions which can hereafter be remedied only at enormous expense, Government is considering the introduction of legislation to enable its improvement to be taken up.

6. Excavation area.—The suburban area is studded with tanks which must be filled up, both for sanitary reasons and in order to provide building sites; and one of the greatest obstacles to town planning operations is the practical difficulty of obtaining earth for the purpose. The Governor in Council congratulates the Trust on the foresight with which it has handled this problem by acquiring some 400 bighas of land in Ward XXI, from which an adequate supply of earth will be obtained, while the excavation area will gradually be transformed into a spacious park and lake.

7. Re-housing schemes.—One of the objects of the Calcutta Improvement Act is the re-housing of persons of the poorer and working classes displaced by the execution of improvement schemes, but so far the action taken by the Trust to carry out this object does not appear to have been either adequate or satisfactory in its results. It has undertaken only one re-housing scheme which cannot be said to have been a success. The buildings erected by the Trust consist of a block of tenement dwellings (like the chawls set up by the Bombay Improvement Trust) which have not attracted the class for which they were intended. They are now largely occupied by men of the poorer *bhadralok* class, students and others living without their families, who have not been displaced by the operations of the Trust. The whole question has recently been reviewed by the Board of Trustees and by Government, and the Governor in Council is pleased to observe that the Trust is contemplating the provision of housing facilities for those who are rendered homeless by the removal of bustees.

8. Proposed public streets.—The execution of large street schemes involving extensive engineering works, has, for obvious reasons, to be spread over several years, while in the meantime old buildings make room for new and more costly structures. The consequent necessity of vesting the Trust

with powers, similar to those already enjoyed by the Corporation, of preventing important schemes being blocked by the erection of new buildings was soon realized after the Trust began its operations, and the Calcutta Improvement Amendment Act (III B. C. of 1915) gave it authority to lay down the lines of projected public streets and to prohibit the erection of new buildings within such lines. Altogether 31 important alignments were published by the Trust in the period under review; and 21 have been sanctioned by Government, thus largely setting at rest the uncertainty caused to intending builders by the operations of the Trust.

9. **Finance.**—The total receipts under the capital account during the three years ending the 31st March 1918 amounted to 58½ lakhs (against 43 lakhs accrued during the previous three years). The sale and lease of lands and buildings accounted for 48½ lakhs; the remaining 10 lakhs was the second instalment of the Government grant of 50 lakhs in aid of the capital account of the Board. The expenditure under the capital account during the same period on account of acquisition of land and engineering works amounted to 117½ lakhs against 52 lakhs spent during the previous three years. The deficit of 59 lakhs was met from the surplus available under the revenue account.

The revenue account opened in 1915-16 with a balance of 67 lakhs and the receipts during the three years under review amounted to 85½ lakhs, against 75 lakhs during the previous three years. This sum included 44½ lakhs derived from taxation, viz., the duty on transfers of property, the terminal tax and the duty on jute, 26 lakhs contributed by the Calcutta Corporation (partly in municipal debentures at their face value), a recurring grant of 4½ lakhs from Government, 6½ lakhs obtained from interest on investments and 4 lakhs derived from rents and miscellaneous receipts. The expenditure under the revenue account during the same period amounted to 14 lakhs on account of establishment and rents, rates and taxes, and 8 lakhs on account of depreciation of investments. The account closed on the 31st March 1918 with a surplus balance of 130½ lakhs, including two sums of 9 lakhs and 59 lakhs transferred to the capital account.

The actual commitments of the Trust on schemes already undertaken are considerable, while 30½ lakhs of the balance consists of depreciated Government securities. It seems clear that at the present rate of work the cash balances, in spite of the accretion of the capital account by the sale of land, will be largely depleted by the execution of important works now in hand, while the sanctioned schemes not yet begun will involve in the near future a large cash expenditure on the acquisition of land (which will subsequently, however, be recouped in a considerable measure) and a large outlay on engineering works.

10. **Attitude of the public towards the Trust.**—The misgivings and even hostility with which some sections of the public viewed the creation of the Trust appear to have given place to a juster appreciation of the public good. Evidence of its work for the betterment of Calcutta is visible in many quarters, and the citizens of Calcutta have begun to realize the value of its operations in spite of the necessary conflict with private interests which they involve. This change of view appears to be due both to the good sense of the people and to the tact and sympathy which the Trust and Land Acquisition Officers have shown in their dealings with the public. Residents of insanitary localities now generally either welcome or acquiesce in its intervention. A significant instance of this altered attitude is afforded by the resolution passed unanimously by the Municipal Commissioners of Howrah that the provisions of the Calcutta Improvement Act should be extended to that municipality without further delay. The complaint that the south of Calcutta has received more attention than the north, and the demand that the Trust should give preference to the latter, are in themselves an admission of the beneficent work of the Trust. The Governor in Council is disposed to think that the complaint, less common than it used to be, has no justification in fact. The Russa Road and Khowanipur schemes find a worthy counterpart in those for Shambazar, Surtibagan and the Central Avenue. An examination of the programme of the Trust, moreover, gives convincing proof that it has

been guided and influenced by a broad-minded conception of the needs of Calcutta as a whole.

11. **Conclusion.**—In congratulating the Trust on the work it has done, on the large yet prudent policy it has followed, and on the steady prosecution of its programme, in spite of financial stringency and costly litigation, the Governor in Council desires to offer his special thanks to Mr. Bompas, who will, he understands, be shortly retiring. It fell to the lot of Mr. Bompas, as the first Chairman of the Trust, to lay down the broad lines of its work. Presented with large funds, and asked in consultation with his co-trustees to improve Calcutta, he had to assume large responsibilities. Initial mistakes in financial policy and in an understanding of Calcutta's needs must have had serious consequences. The Governor in Council believes that Mr. Bompas' colleagues and the public of Calcutta will share his view that the lines of policy were well and truly laid by Mr. Bompas. The Governor in Council desires also to thank Mr. J. C. K. Peterson, C.I.E., and Rai. Bangshidar Banerjee Bahadur, C.I.E., for their excellent work as Land Acquisition Officers, and to acknowledge the valuable services of Mr. Shroobree, late Chief Valuer and Surveyor, and of Mr. Maden, late Chief Engineer.

By order of the Governor in Council,

L. S. S. O'MALLEY,
Secy. to the Govt. of Bengal.

[Sixth publication.]

The 16th May 1919.

No. 3.—Notification.—The following draft of an amendment, which, in exercise of the power conferred by sections 6 and 11 of the Canals Act, 1864. (Bengal Act V of 1864), the Governor in Council intends to make in the schedule of tolls in force on the Calcutta canals and Tolly's Nala and in the rules for the management of navigation thereon, published in notification No. 7, dated the 11th May 1915 (at pages 903-05 of Part I of the *Calcutta Gazette* of the 12th *idem*), is hereby published for the information of persons likely to be affected thereby.

2. The draft will be taken into consideration on or after the 2nd July 1919, and any objection or suggestion received by the undersigned before that date will be duly considered.

Draft amendment.

Delete items 13 and 15 and read item 14 as item 13.
Add as item 14.

14. (1) During the period of closure of the Tolly's Nala at Samookpota, boats laden with firewood will be allowed to proceed to or from the river Bidyadhari or the Bhangore khal through the Circular or Kristopur Canal and the Tolly's Nala *via* Kidderpore on payment of two rupees per hundred maunds of measured maundage for passage through these canals. All other cargo boats will pay a rate of one rupee and twelve annas per hundred maunds of measured maundage.

(2) Boats plying under this concession will not be allowed either to load or to unload their cargo along the Circular Canal the Kristopur Canal, or the river Hooghly. Infringement of this rule will render such boats liable to the ordinary tolls in force for the Circular Canal.

(3) (a) Boats laden with cargo other than firewood may pick up extra cargo, either in the Kristopur Canal, the Circular Canal or the river Hooghly. The toll collectors at Chitpur, Kristopur and Dhappa, respectively, will, in that case, assess and collect the extra toll due on the cargo at twelve annas per hundred maunds, provided the maundage of the boat does not exceed that when it originally entered at Dhappa or Kristopur.

(b) If there is an excess at the time of leaving Tolly's Nala a rate of two rupees and eight annas per hundred maunds will be charged on the extra cargo at Kidderpore. This will entitle the boat to pass beyond Dhappa or Kristopur without any further payment.

(c) If cargo is picked up either in the Hooghly or in the Circular or Kristopur Canal the extra toll on the extra amount will be charged at the rate of one rupee and twelve annas per hundred maunds.

2. Every candidate for appointment to be made under these rules must have served in His Majesty's Naval, Military, or Air Forces during the war

6. Candidates must submit to the Civil Service Commissioners an application in the form prescribed by them, and pay on application such fee as is appointed by them.

7. Candidates who appear from their forms of application to be *prima facie* eligible for appointment to the Indian Civil Service will be subject to such tests as the Civil Service Commission may prescribe in the way of (a) a qualifying examination, written or oral; (b) the production of written evidence including school record, university record (if any), military record, and personal references; (c) interview by Selection Board; (d) medical examination.

8. Candidates recommended by the Civil Service Commissioners will be accepted by the Secretary of State for India in Council as selected candidates for the Indian Civil Service, subject to any further enquiries that he may find it necessary to institute, and will be required to undergo such period of probation as may be hereafter prescribed. At the end of this period of probation they will be tested by the Civil Service Commissioners, or by an authority in India specially empowered in this behalf, in Indian law and languages, and in any other subjects which may be prescribed, and in riding. NOTICE.

INDIAN POLICE FORCE.

The Secretary of State for India in Council has decided not to hold any competitive examination, during the years 1919 and 1920, for admission into the Indian (Imperial) Police Service, but to make appointments by nomination as described below from among gentlemen who have rendered military service during the war.

2. *Conditions of eligibility.*

Selection will be confined to candidates who have rendered military service during the period of hostilities. Every candidate must also be a British subject of European descent, and at the time of his birth his father must have been a British subject, either natural born or naturalized in the United Kingdom. In cases of doubt whether a candidate satisfies these conditions, the decision of the Secretary of State for India in Council, and, where nomination is made in India, that of the Government of India, will be final. Candidates must have been born on or after the 2nd June 1894 and on or before the 1st August 1900, and must be unmarried. They must be certified by their Commanding Officers to be of good moral character and physically fit for service in India. They must have been educated up to a reasonable standard such as is normally required for Sandhurst and it may further be necessary to subject them to a qualifying educational test. A percentage of vacancies will probably be filled by appointment in India.

3. *Medical examination.*

Selected candidates will be required to undergo an examination by a medical board as to their physique and capacity of active out-door work in the plains of India. Instructions as to the date and time of this examination will be issued in due course.

4. *Riding tests.*

Those who have passed the medical examination and satisfy the other requisite conditions will be appointed as probationers. They will then be examined as to their ability to ride, and will be required as hitherto to obtain before appointment—

- (a) a certificate that they are able to ride well and perform journeys on horse-back, or
- (b) a certificate of minimum proficiency in riding.

In the latter case they will be subjected after appointment to such further test in riding as may be prescribed by their Government, and will not be appointed Assistant Superintendents of Police until they shall have passed such tests to the satisfaction of their Governments.

5. *Allotment to Provinces.*

Selected candidates who have successfully passed the above mentioned tests will be allotted, as probationers, to one or other province on a consideration of all the circumstances, including their own wishes; but the requirements of the public service will rank before every other consideration. The allotment will also be subject to the right of the Government of India to make transfers between provinces if necessary.

6. Uniform, etc.

It is an ordinary condition of appointment to the Police Department that a probationer should provide himself with—

- (a) either a uniform or the cost of it, and
- (b) not less than £50 for the purchase of a horse and saddlery in India.

7. Free passages to India will be provided for candidates who are appointed in England, but any probationer resigning his appointment within three years on any ground but that of health, supported by a medical certificate, will be required to refund the cost of his passage.

8. Salary.

His Majesty's Secretary of State for India has been pleased to sanction revised rates of pay for officers of the Imperial Police of the rank of Deputy Inspector-General and downwards with effect from the 1st January 1919. From that date onward there will be two scales of pay, a senior and a junior. Officers will draw pay in the senior or the junior scale according as they are holding superior appointments (*i.e.*, Superintendents of Police and upwards) or not. The scales will be as follows:—

Years of service				Junior scale, Rs. per mensem	Senior scale Rs. per mensem
1st	350	...
2nd	400	...
3rd	400	...
4th	450	600

INSURANCE.

No. 4638, dated Simla, the 9th June 1919.

RESOLUTION—By the Government of India, Department of Commerce and Industry.

IN view of the results disclosed by the actuarial valuation of the assets and liabilities of the Post Office Insurance Fund as at 31st March 1912, the Government of India announced, in the Resolution from this Department No. 4016-4050-91, dated the 22nd May 1914, the grant of a bonus to the policy-holders. A further valuation of the Fund as at 31st March 1917 has again shown a substantial surplus so as to permit of the distribution of a considerable portion thereof without upsetting the financial stability of the Fund. The Governor-General in Council is accordingly pleased to grant, to the holders of policies in force on 31st March 1917, a reversionary bonus as an addition to and payable with the sum assured, at the rate of $1\frac{1}{2}$ per cent. thereon in the case of Whole Life Assurances, secured by premiums payable throughout life or for a limited period, or under which no further premiums are payable, and 1 per cent. in the case of Endowment Assurances for each full year the respective policies were in force between 1st April 1912 and 31st March 1917. This bonus will be allowed in the case of policies now in force and of all claims which have arisen either by death or survival since 31st March 1917 under policies in force on that date, but not to policies surrendered before the date of this Resolution. In the case of transferred or reduced policies, bonus will be allotted to the respective policies as they existed on 31st March 1917. In addition to the above mentioned bonus, an interim bonus at two-thirds of the above rates will be allowed in the case of Whole Life and Endowment Assurance policies which become claims by death between 1st April 1917 and 31st March 1922 for each full year they

were in force during that period. An *interim* bonus at the rate of 1 per cent. will be allowed in the case of Endowment Assurance policies which become claims by survivance between 1st April 1917 and 31st March 1922 for each full year they were in force during that period. The *interim* bonus will be based on the amount of the sum assured at date of death or survivance. No fraction of a rupee will be payable as bonus.

The Governor-General in Council is also pleased to direct that under Limited Payment and Endowment Assurance policies the maximum number of monthly premiums payable after this date will be 12 times the difference between the office age at entry and the age at which the premiums are to cease.

Ordered, that this Resolution be communicated to the several Departments of the Government of India, to all Local Governments and Administrations, to all Heads of Departments subordinate to this Department, and to the Accountant-General, Posts and Telegraphs.

Ordered, also, that a copy be forwarded to the Director-General of Posts and Telegraphs for necessary action.

PART IB.

Orders by the Governor of Bengal in Council.

MUNICIPAL AND LOCAL.

NOTIFICATIONS.

No. 551P-L.S.-1.—The 18th June 1919.—The following draft of rules which the Governor in Council proposes to make under clauses (a) and (b) of sub-section (2) of section 101 of the Bengal Village Self-Government Act, 1919 (Bengal Act V of 1919), is published for the information of persons likely to be affected thereby.

2 The draft will be taken into consideration on the 6th August 1919, and any objection or suggestion received by the undersigned through District Officers before that date will be duly considered.

Rules under the Village Self-Government Act, 1919, for the election and appointment of Members and Presidents of Union Boards and the election of Vice-Presidents.

DEFINITION.

1. In these rules the terms "District Magistrate" and "circle officer" have the meanings defined by section 4 of the Act.
(Cf. rule 11(a) of the election rules under the Local Self-Government Act.)

PRELIMINARY.

2. The first election of a union board under these rules shall take place within six months after its establishment under section 6 of the Act.
(Cf. Local Board election rule 2.)

3. Whenever a union, constituted under section 6 of the Act, comprises two or more villages, the District Magistrate shall decide in what manner such union shall be divided into electoral wards and the number of members to be returned for each of such wards.
(Cf. Union Committee election rule 2.)

Provided that if it is thought convenient, a union may consist of one electoral ward only.

REGISTRATION OF VOTERS.

4. The circle officer shall cause to be prepared for each union, ward by ward, a register of persons qualified to vote.
(Cf. Local Board election rule 22.)

5. The members of a joint undivided family qualified under section 7 (iii) of the Act shall nominate a male member of the family, of the full age of 21 years and

having a place of residence within the union, to vote on their behalf at an election. The name of the selected member shall be communicated to the circle officer at least one month before the date fixed for the election and shall be entered in the register of voters. No other member of the family shall be permitted to vote.

6. At least two months before the date fixed for an election a copy of the register showing the persons qualified to vote shall be published at a conspicuous place within the union.

7. Any person whose name does not appear in the register and who claims the right to vote, and any person who considers that any name in the register ought to be omitted, may submit to the circle officer an application to have his name inserted in, or the name of another person omitted from, the register. All such applications shall state distinctly the grounds of application and shall be made at least one month before the date fixed for the election. They shall be enquired into by the circle officer, whose decision shall be final.

8. The register of voters as amended after the decision of claims and objections under rule 7 shall be considered to be the final register of persons entitled to vote at the election, and no person whose name does not appear in it shall be permitted to vote.

CANDIDATES FOR ELECTION.

9. The circle officer shall, at least six weeks before the date fixed for election, issue notices calling for names of candidates for each ward. Such notices shall be published at every village within the ward. Within three weeks from the date of publication of the notices, every person who is a candidate for election shall send his name to the circle officer in writing supported by the signatures of five voters. No names shall be received after the expiration of such period.

10. The circle officer shall ascertain whether all the candidates are duly qualified under section 7(2) of the Act; his decision on this point shall be final.

11. A list showing, ward by ward, the names of candidates who are duly qualified shall be published in each ward at least one week before the date fixed for the election. No candidate whose name does not appear in the list shall be eligible for election.

THE MANNER OF HOLDING ELECTIONS.

12. The election shall be held on such date or dates and at such place or places within the union as may be fixed by the circle officer. The place or places at which and the hours between which the votes will be recorded shall be notified within the union by the publication of notices at the same time as the list of candidates is published under rule 11.

13. The votes of all duly registered voters who are present between the hours mentioned in the notice within the building or enclosure in which the election is held shall be recorded. No voter shall be admitted within the building or enclosure after the expiry of the period mentioned in the notice.

14. A voter shall be entitled to vote for the ward in which he ordinarily resides and for no other.

15. The elections for the different wards in the union shall be held in succession. The circle officer or other person, not being himself a candidate, deputed by the District Magistrate for the purpose, shall preside at the election.

16. The proceedings for the election for each ward shall commence by the presiding officer explaining the nature and objects of the meeting to the assembled voters. He shall then read out the list of candidates and state the number of vacancies for such ward.

(Cf. Union Committee election rule 10 and Local Board election rule 38.)

17. If the number of candidates is not greater than the number of vacancies, the presiding officer shall at once declare such candidates to be duly elected.

(Cf. Local Board election rule 40 and Municipal election rule 16.)

18. If the number of candidates exceeds the number of vacancies, the presiding officer shall proceed to take a poll for each candidate, recording the number of votes given for each candidate with his own hand.

(Cf. Local Board election rule 41)

19. Each voter shall be entitled to vote for as many candidates as there are vacancies, but shall not give more than one vote for any candidate.

(Cf. Local Board election rule 35)

20. All persons wishing to vote must be present at the election. No vote by proxy or in writing shall be received.

(Cf. Local Board election rule 36)

21. No objection to a voter shall be entertained except on the ground that he is not the person under whose name as entered in the voters' register he claims to vote. Such objections shall be summarily decided by the presiding officer, whose decision shall be final.

(Cf. Local Board election rule 42 and Municipal election rule 23)

22. The presiding officer shall then and there declare such candidates as have the largest number of votes to be duly elected. In the case of an equal number of votes being recorded in favour of two or more candidates, all of whom cannot be returned, selection shall be made from such candidates by lot, in such manner as the presiding officer may deem fit. The candidate thus selected shall be declared to be duly returned.

(Cf. Union Committee election rule 12 and 13)

23. If any candidate, having been duly elected under rule 22, declines to take office or is found not to be duly qualified, the unsuccessful candidate, if any, who received the largest number of votes shall be declared to be duly elected. If there is no unsuccessful candidate, a fresh election shall be held to fill the vacancy thus created.

(Cf. Union Committee election rule 14, Local Board election rule 46, and Municipal Board election rule 27)

24. If the number of candidates exceeds the number of vacancies, no candidate shall be declared to be duly elected unless 10 per cent. of the registered voters have appeared and recorded their votes, and the election shall be held to have failed.

(Cf. Union Committee election rule 16 and Local Board election rule 48)

25. If an election fails under rule 24, the presiding officer shall at once report the fact to the District Magistrate, explaining the circumstances which led to the failure. After considering all the circumstances the District Magistrate shall decide whether the vacancy or vacancies shall be filled by appointment or there shall be another election for the purpose. If, in his opinion, the failure was due to no default or neglect of the voters, he shall direct that another election shall be held and shall fix a date for such election, for which the register of voters previously prepared shall hold good.

(Cf. Section 5(4) of the Act and Union Committee election rule 14)

MISCELLANEOUS.

26. Save as otherwise provided, all disputes arising under the preceding rules shall be decided by the District Magistrate or under his general or special orders by the Sub-divisional Officer within whose jurisdiction the union lies.

(Cf. rule 1(a) of the election rules under the Local Self-Government Act)

27. Except as provided by rule 24, no election held under the preceding rule shall be invalidated on any ground whatever.

(Cf. Union Committee election rule 17)

28. The list of duly returned candidates shall be forwarded to the District Magistrate within a week after the election.

29. No person in the employment or pay of the District, Local or Union Board shall directly or indirectly engage in canvassing for votes or otherwise assist in the election of any candidate otherwise than by giving his own vote. Any breach of this rule will render him liable to dismissal.

(Cf. Local Board election rule 51)

30. All costs incurred in the preparation of the register of voters, the publication of notices, the holding of elections, or taking any other necessary action under these rules shall be payable from the union fund. In the case of a newly-created union board, in which no union fund has been formed, the District Magistrate shall advance such sums as may be required; and such sums shall be recoverable from the union board within six months.

Cf. Union Committee election rule 6, Local Board election rule 52 and Municipal election rule 31.

APPOINTMENT OF MEMBERS.

31. As soon as possible after the receipt of the list of elected members referred to in rule 28 the District Magistrate shall appoint members, if any, under sub-sections (3) and (4) of section 6 of the Act.

(Cf. section 14 (2) (a) of the Act)

PUBLICATION OF THE NAMES OF MEMBERS.

32. The District Magistrate shall forward a list of duly elected and appointed members to the Commissioner of the Division for publication in the *Calcutta Gazette*.

(Cf. Union Committee election rule 18 and Local Board election rule 48)

ELECTION OF PRESIDENT.

33. Within a week after the names of the members have been notified in the *Calcutta Gazette*, the District Magistrate shall send a copy of the notification to the circle officer or such other person as the said Magistrate may select, with an order directing him to convene a meeting of the members for the purpose of electing a President from among them, within one month from the date of such order.

(Cf. rule 77A of the Part IV rules under the Local Self Government Act relating to proceedings at meetings)

34. At such meeting one-half of the number of members shall be necessary to form a quorum, and there shall be no election of a President unless a quorum is present.

(Cf. rule 77A of the Part IV rules under the Local Self Government Act relating to proceedings at meetings)

35. The meeting shall be presided over by the officer or person convening it under rule 33. The presiding officer shall ask the members to record their votes in writing, and each of the members voting shall hand to him a signed voting paper containing the name of the person for whom he votes. No member shall vote for more than one candidate.

(Cf. rule 42 of the model rules of business for Municipalities)

36. The candidate for whom there is the largest number of votes shall be declared by the presiding officer to be the President of the Board. In the case of equality of votes, the presiding officer shall give a casting vote.

(Cf. rule 42 of the model rules of business for Municipalities)

37. If the members fail to elect a President within one month of the Magistrate's order, the fact shall be reported to the District Magistrate, who shall then ask the District Board to appoint, under section 8 of the Act, one of the members to be the President.

(Cf. rule 77A of the Part IV rules under the Local Self Government Act relating to proceedings at meetings)

ELECTION OF VICE-PRESIDENT.

38. After the President has thus been elected or appointed, as the case may be, the members shall, if they consider a Vice-President necessary elect one of their own number to be the Vice-President in the same manner as that prescribed for the election of the President in rules 35 and 36, the newly elected or appointed President performing the functions of the presiding officer.

(Cf. section 1 of the Act and rule 41A of the model rules of business for Municipalities)

BY-ELECTION.

39. In the case of a casual vacancy occurring under section 13 of the Act on account of the removal, resignation, or death of an elected member, the vacancy shall be filled by election in the manner prescribed by rules 9 to 23, and the provisions of rules 24 to 32 shall be applicable to such

(Cf. section 13 of the Act and Municipal election rule 12)

election. It shall not be necessary to publish the register of voters or extracts from it, provided that the register shall at all times be open to public inspection at the office of the union board, and all persons whose claims have been admitted under rule 7 shall be entitled to vote at such election. The President shall in the case of each by-election publish a notice stating the latest date upon which claims to be registered will be received.

40. When the office of the President becomes vacant under section 17, the vacancy shall be filled by election in the manner prescribed by rules 34 to 36, within two weeks from the date of election of a member in his place under rule 39. If the members fail to elect a President within that period, the District Board shall appoint a new President. In the case of a similar vacancy in the office of the Vice-President, it shall be filled, if the members of the union board consider it necessary to elect another Vice-President, by election in the manner prescribed by rule 38 after the vacancy, if any, created on the union board has been filled by election or appointment as the case may be.
